

COURSE OUTCOMES IN DETAIL – DEPART

1. B.Com. (Honours)

Paper No – BCH 1.2: Semester - I FINANCIAL ACCOUNTING

Objective: To acquire conceptual knowledge of the financial accounting and to provide knowledge about the techniques for preparing accounts in different business organizations.

Paper No – BCH 1.3: Semester - I BUSINESS LAWS

Objective: To impart basic knowledge of the important business laws along with relevant case laws.

Paper No – BCH 1.4 (a): Semester - I MICRO ECONOMICS (GE)

Objective: To acquaint the students with the concepts of micro economics dealing with consumer behaviour and also understand the behaviour of firms under different market structures.

Paper No – BCH 1.4 (b): Semester - I INSURANCE AND RISK MANAGEMENT (GE)

Objective: To develop an understanding among students about identifying analysing and managing various types of risk. Besides the students will be in a position to understand along with its regulatory framework.

Paper No – BCH 2.2: Semester - II CORPORATE ACCOUNTING

Objective: To acquire the conceptual knowledge of the corporate accounting and to understand the various techniques of preparing the accounting and financial statements.

Paper No – BCH 2.3: Semester - II CORPORATE LAWS

Objective: To impart basic knowledge of the provisions of the Companies Act, 2013 and the Depositories Act, 1996. Case studies involving issues in corporate laws are required.

Paper No – BCH 2.4 (a): Semester - II MACRO ECONOMICS (GE)

Objective: To provide the students with knowledge of basic concepts of the macro economics and modern tools of macro economics analysis.

Paper No – BCH 2.4 (b): Semester – II INVESTING IN STOCK MARKETS (GE)

Objective: To provide basic skills to operate in stock market and the ways of investing in it. It will enable the student to take up investment in stock market independently.

Paper No – BCH 3.1: Semester – III HUMAN RESOURCE MANAGEMENT

Objective: To acquaint students with the techniques and principles to manage human resource of an organisation.

Paper No – BCH 3.2: Semester – III INCOME TAX LAW AND PRACTICE

Objective: To provide basic knowledge and equip students with application of principles and provisions of Income-Tax Act, 1961.

Paper No – BCH 3.3: Semester – III MANAGEMENT PRINCIPLES AND APPLICATIONS

Objective: To provide the student with an understanding of basic management concepts, principles and practices.

Paper No – BCH 3.4 (a): Semester – III BUSINESS STATISTICS (GE)

Objective: To familiarize students with the basic statistical tools used to summarize and analyze quantitative information for decision making.

Paper No – BCH 3.4 (b): Semester – III PROJECT MANAGEMENT (GE)

Objective: To enable the student to evolve a suitable framework for the preparation, appraisal, monitoring and control and hedge risk of industrial project.

Paper No – BCH 3.5 (a): Semester – III E-COMMERCE (SEC)

Objective: To enable the student to become familiar with the mechanism for conducting business transactions through electronic means.

Paper No – BCH 3.5 (c): Semester – III E-MARKETING (SEC)

Objective: This course aims at providing the knowledge of concept, tools and techniques of E-marketing.

Paper No – BCH 4.1: Semester - IV COST ACCOUNTING

Objective: To acquaint the students with basic concepts used in cost accounting and various methods involved in cost ascertainment systems and use of costing data for planning.

Paper No – BCH 4.2: Semester - IV BUSINESS MATHEMATICS

Objective: To familiarize the students with the basic mathematical tools with emphasis on applications to business and economic situations.

Paper No – BCH 4.3: Semester - IV COMPUTER APPLICATIONS IN BUSINESS

Objective: To provide computer skills and knowledge for commerce students and to enhance the student understands of usefulness of information technology tools for business.

Paper No – BCH 4.4 (a): Semester - IV INDIAN ECONOMY (GE)

Objective: To acquaint the students with the policy regimes, structure and sectoral trends of Indian economy.

Paper No – BCH 4.4 (b): Semester - IV ECONOMICS OF REGULATION OF DOMESTIC AND FOREIGN EXCHANGE MARKETS (GE)

Objective: To acquaint the students with the economics of regulation of domestic and foreign exchange markets.

Paper No – BCH 4.5 (a): Semester - IV ENTREPRENEURSHIP (SEC)

Objective: To understanding about entrepreneurship and creative thinking and behaviour for effectiveness at work and in life.

Paper No – BCH 4.5 (b): Semester - IV COLLECTIVE BARGAINING AND NEGOTIATION SKILLS (SEC)

Objective: To promote understanding of the concept and theories of collective bargaining and also to provide exposure to the required skills in negotiating a contract.

Paper No – BCH 4.5 (c): Semester - IV E-FILING OF RETURNS (SEC)

Objective: To provide the students the conceptual and practical knowledge about electronic filing of returns.

Paper No – BCH 4.5 (c): Semester - IV CYBER CRIMES AND LAWS (SEC)

Objective: This paper intends to create an understanding towards the cybercrimes and to familiarize the students with the application of cyber laws in general.

Paper No – BCH 5.1: Semester - V PRINCIPLES OF MARKETING

Objective: The objective of this course is to provide basic knowledge of concepts, principles, tools and techniques of marketing.

Paper No – BCH 5.2: Semester - V FUNDAMENTALS OF FINANCIAL MANAGEMENT

Objective: To familiarize the students with the principles and practices of financial management.

Paper No – BCH 5.3(a): Semester - V MANAGEMENT ACCOUNTING

Objective: To impart the students, knowledge about the use of financial, cost and other data for the purpose of managerial planning, control and decision making.

Paper No – BCH 5.3(b): Semester - V ORGANISATIONAL BEHAVIOUR

Objective: To develop a theoretical understanding among students about the structure and behaviour of organization as it develops overtime. The course will also make them c

Paper No – BCH 5.4(d): Semester - V ADVERTISING

Objective: The objective of this course is to familiarize the students with the basic concepts, tools and techniques of advertising used in marketing.

Paper BCH 5.4(e): Semester - V BUSINESS STATISTICS

Objective: To familiarize students with the basic statistical tools used to summarize and analyze quantitative information for decision making.

Paper No – BCH 6.1: Semester - VI AUDITING AND CORPORATE GOVERNANCE

Objective: To provide knowledge of auditing principles, procedures and techniques in accordance with current legal requirements and professional standards.

Paper No – BCH 6.2: Semester - VI GOODS & SERVICE TAX (GST) & CUSTOMS LAW

Objective: To provide students with a working knowledge of principles and provisions of GST and Customs Law.

Paper No – BCH 6.3 (a): Semester – VI FUNDAMENTALS OF INVESTMENT

Objective: To familiarize the students with different investment alternatives, introduce them to the framework of their analysis and valuation and highlight the role of investor

Paper No – BCH 6.3 (d): Semester – VI NEW VENTURE PLANNING

Objective: The curriculum aims at giving exposure to students regarding different aspects of setting up a new business. After completing the course student should be able to de various sources of new business ideas of products and services. The understanding of this paper will help them to examine, evaluate and approach different sources of finance, t a comprehensive business plan.

Paper No – BCH 6.4 (a): Semester – VI FINANCIAL REPORTING AND ANALYSIS

Objective: To gain ability to understand, analyse and interpret the basic framework of financial reporting.

Paper No – BCH 6.4 (c): Semester – VI INTERNATIONAL BUSINESS

Objective: The objective of the course is to expose students to the concept, importance and dynamics of international business and India's involvement with global business op

2. B.Com.

Paper No – BC 1.2: Semester –I FINANCIAL ACCOUNTING

Objective: The objective of this paper is to help students to acquire conceptual knowledge of the financial accounting and to impart skills for recording various kinds of busines

Paper No – BC 1.2: Semester –I BUSINESS ORGANISATION AND MANAGEMENT

Objective: The course aims to provide basic knowledge to the students about the organisation and management of a business enterprise.

Paper No – BC 2.2: Semester - II BUSINESS LAWS

Objective: To objective of the course is to impart basic knowledge of the important business laws along with relevant case laws.

Paper No – BC 2.3: Semester - II BUSINESS MATHEMATICS AND STATISTICS

Objective: The objective of this course is to familiarize students with the applications of Mathematics and statistical techniques in business decisions.

Paper No – BC 3.1: Semester - III COMPANY LAW

Objective: The objective of the course is to impart basic knowledge of the provisions of the Companies Act, 2013. Case studies involving issues in company laws are required to l

Paper No – BC 3.2: Semester – III INCOME TAX LAW AND PRACTICE

Objective: To provide basic knowledge and equip students with application of principles and provisions of Income-Tax Act, 1961.

Paper No – BC 3.4 (a): Semester – III COMPUTER APPLICATIONS IN BUSINESS (SEC)

Objective: To provide computer skills and knowledge for commerce students and to enhance the student understanding of usefulness of information technology tools for busin

Paper No – BC 3.4 (b): Semester - IV CYBER CRIMES AND LAWS (SEC)

Objective: This paper intends to create an understanding towards the cyber crimes and to familiarize the students with the application of cyber laws in general.

Paper No – BC 4.2: Semester - IV CORPORATE ACCOUNTING

Objective: To help the students to acquire the conceptual knowledge of the corporate accounting and to understand the various techniques of preparing the accounting and fir

Paper No – BC 4.3: Semester - IV COST ACCOUNTING

Objective: To acquaint the students with basic concepts used in cost accounting and various methods involved in cost ascertainment systems and use of costing data for planni

Paper No – BC 4.4 (a): Semester – IV E-COMMERCE (SEC)

Objective: To enable the student to become competent to understand the mechanism for excelling in e-commerce based employments and self-employment opportunities.

Paper No – BC 4.4 (b): Semester – IV INVESTING IN STOCK MARKETS (SEC)

Objective: This paper intends to provide basic skills to operate in stock market and the ways of investing in it. It will enable the student to take up investment in stock market in

Paper No – BC 5.1 (a): Semester – III HUMAN RESOURCE MANAGEMENT

Objective: The objective of the course is to acquaint students with the techniques and principles to manage human resource of an organisation.

Paper No – BC 5.1 (b): Semester - V PRINCIPLES OF MARKETING

Objective: The objective of this course is to provide basic knowledge of concepts, principles, tools and techniques of marketing.

Paper No – BC 5.2 (a): Semester - V FUNDAMENTALS OF FINANCIAL MANAGEMENT

Objective: To familiarize the students with the principles and practices of financial management.

Paper No – BC 5.2 (b): Semester - V GOODS & SERVICE TAX (GST) & CUSTOMS LAW

Objective: To provide students with a working knowledge of principles and provisions of GST and Customs Law.

Paper No – BC 5.3 (a): Semester - IV ENTREPRENEURSHIP (SEC)

Objective: The purpose of the paper is to provide orientation towards entrepreneurship as a career option and encourage creative thinking for effectiveness at work and in life.

Paper No – BC 5.3 (b): Semester - V ADVERTISING (SEC)

Objective: The objective of this course is to familiarize the students with the basic concepts, tools and techniques of advertising used in marketing.

Paper No – BC 5.4 (a): Semester - V PRINCIPLES OF MICRO ECONOMICS (GE)

Objective: objectives of the course to acquaint the students with the concepts of micro economics dealing with consumer behaviour and make them understand the supply side behaviour of firms.

Paper No – BC 5.4 (b): Semester - V ECONOMICS OF REGULATION OF DOMESTIC AND FOREIGN EXCHANGE MARKETS (GE)

Objective: To acquaint the students with the economics of regulation of domestic and foreign exchange markets.

Paper No – BC 6.1(c): Semester - VI MANAGEMENT ACCOUNTING

Objective: To provide the students knowledge about use of cost data for planning, control and decision making.

Paper No – BC 6.2 (a): Semester – VI INTERNATIONAL BUSINESS

Objective: The objective of the course is to expose students to the concept, importance and dynamics of international business and India's involvement with global business operations foundations of international business to the extent these are relevant to understand the mechanics of global business operations and development.

Paper No – BC 6.2 (c): Semester – VI FUNDAMENTALS OF INVESTMENT

Objective: To familiarize the students with different investment alternatives, introduce them to the framework of their analysis and valuation and highlight the role of investor

Paper No – BC 6.2(e): Semester - VI ORGANISATIONAL BEHAVIOUR

Objective: The objective of the course is to develop a theoretical understanding among students about the structure and behaviour of organization as it develops overtime. The competitiveness for firms.

Paper No – BC 6.3(a): Semester - VI PERSONAL SELLING AND SALESMANSHIP

Objective: The purpose of this course is to familiarize the students with the fundamentals of personal selling and the selling process.

Paper No – BC 6.3 (b): Semester - VI COLLECTIVE BARGAINING AND NEGOTIATION SKILLS

Objective: To promote understanding of the concept and theories of collective bargaining and also to provide exposure to the required skills in negotiating a contract.

3. B.A. (Honours) in Business Economics

CORE DISCIPLINE COURSES

Semester-I (C-1) : PAPER NAME - MICROECONOMICS AND APPLICATIONS- I

This course includes the basics of Microeconomics such as demand and supply analysis, consumer theory, production theory, cost theory and market structure. The understanding of management/economics and also for cost and benefit analysis in corporate organizations. Thus, the scope of this course includes teaching, research in management/economics

Semester-I (C-2) : PAPER NAME - ACCOUNTING FOR MANAGERS

To help the student to acquire conceptual knowledge of the fundamental of financial accounting and to learn the technique of recording business transaction. It also imparts skill used in ascertaining cost. Also paper helps them to get knowledge about use of costing data for planning and decision making.

Semester-II (C-3) : PAPER NAME - MICROECONOMICS AND APPLICATIONS – II

This course includes the basics of Microeconomics such as demand and supply analysis, consumer theory, production theory, cost theory and market structure. The understanding of management/economics and also for cost and benefit analysis in corporate organizations. Thus, the scope of this course includes teaching, research in management/economics

Semester-II (C-4) : PAPER NAME - MATHEMATICS FOR BUSINESS ECONOMICS

This course is core paper for the students studying undergraduate course in business economics. It explains how economic theories can be used or tested practically. Using mathematical models proved by using realistic data available on various variables. When economic theories are mathematically represented, it becomes easier to understand them as well as relationship. Introduction of calculus into economics will teach students to how to analyze economy around them and emerge as a future economist. This paper allows student to understand to predict future.

Semester-III (C-5) : PAPER NAME - MACROECONOMICS AND APPLICATIONS – I

Macroeconomics & Applications is designed to create a strong orientation towards application of economics and related tools at various functions of an enterprise. The course helps students apply the fundamentals and concepts of economics to the day-to-day business problems. The course not only talks about the theories of consumption and investment situation of the country and its relations with the foreign countries. It develops theoretical and analytical skills of the students. In the rapidly changing globalized market scenario, capability to understand and handle the dynamic of economics and the business world.

Semester-III (C-6) : PAPER NAME - STATISTICS FOR BUSINESS ECONOMICS

The course is an introduction to the essential concepts, tools and methods of statistics for students in business economics and similar disciplines. This Statistics course is first step towards the graphical and numerical measures. This course aims at providing students with an understanding of inferential statistics (making valid generalizations from sample data). The emphasis is on thinking rather than computation, formulae and theory.

Semester-III (C-7) : PAPER NAME - CORPORATE FINANCE

The objective of the paper is to familiarize the students with the principles and practices of managing the finances of a corporate. With a view to enable the future managers and executives relating to the financing of a company the curriculum lucidly explains and begins with the basic concepts of finance, its importance and techniques like time value of money. A unit wise comprehensive coverage of all the financial management decisions of investing (capital budgeting and working capital management), financing decision (sources and cost of capital), and an analytical approach the course helps to understand the dynamic discipline of corporate finance.

Semester-IV (C-8) : PAPER NAME - MACROECONOMICS AND APPLICATIONS – II

Macroeconomics & Applications is designed to create a strong orientation towards application of economics and related tools at various functions of an enterprise. The course helps students apply the fundamentals and concepts of economics to the day-to-day business problems. The course not only talks about the theories of consumption and investment situation of the country and its relations with the foreign countries. It develops theoretical and analytical skills of the students. In the rapidly changing globalized market scenario, it develops the capability to understand and handle the dynamics of economics and the business world.

Semester-IV (C-9) : PAPER NAME - BASIC ECONOMETRICS

This course is a core course offered in the fourth semester of the BBE program. The course provides a sound foundation for advanced applied econometric courses. An introductory methods, the course has wide applications in analyzing survey and secondary data in academics, research institutions and industry. Topics include the classical linear regression and dummy variables, multicollinearity, heteroscedasticity, autocorrelation, and specification errors. The core textbook is Basic Econometrics by D. Gujarati. Learning outcome: analyze and interpret micro level as well as aggregate level cross section, time-series and pooled data.

Semester-IV (C-10) : PAPER NAME - MARKETING MANAGEMENT

The basic purpose of marketing management is to make students understand, how to achieve the objectives of the business. A business aims at earning reasonable profits by satisfying customer understanding. Creation of Demand, Customer Satisfaction, Market Share, Generation of Profits and Creation of Goodwill and Public image. Thus this marketing management is very important. It is to raise the goodwill of the business by initiating image-building activities such as sales promotion, publicity and advertisement, high quality, reasonable price, etc.

Semester-V (C-11) : PAPER NAME - QUANTITATIVE TECHNIQUES FOR MANAGEMENT

This course deals with the quantitative techniques required for production analysis and gives the students a new opportunity to learn how market mechanism behaves. Though it is actually a commerce course.

Semester-V (C-12) : PAPER NAME - ORGANIZATION BEHAVIOR

The purpose of this paper is to impart the student an understanding of state of art of management and business concept practices with a view to preparing them to face the emerging business processes and managing managers.

Semester-VI (C-13) : PAPER NAME - INTERNATIONAL ECONOMICS

This paper is offered to the third-year honors students of business economics in their last semester. The focus of the paper is on making students aware about the very foundation important in today's scenario with India trying to vie new markets with its now open economy. The students are navigated through the journey of different theories of international trade and their criticisms. This helps in development of a critical analytical capacity of the students while approaching any new theory. This paper also provides a reference point with respect to international markets of goods, services and currencies.

Semester-VI (C-14) : PAPER NAME - LEGAL ASPECTS OF BUSINESS

The objective of this course is to familiarize the students with various laws that will help them to refine their understanding of how law affects the different aspects of business. Companies Act 2013, Intellectual Property Rights, Consumer Law and Competition Act with particular emphasis on those aspects of the law that impact most upon business and with no legal background and serves as an introduction to legal concepts. The intention of this course is to prepare students to be successful both personally and professionally. At the end of the course, the students will be able to recognize the impact of Indian legal environment on business.

DISCIPLINE SPECIFIC ELECTIVE COURSE (DSE)

Semester-V/VI (DSE-1) : ELECTIVE PAPER NAME - ECONOMIC GROWTH & DEVELOPMENT

This paper is offered as an elective paper to the fifth semester students of BBE. The purpose of the paper is to introduce students to the concept of economic development, distribution of income, common characteristics of developing countries. It also introduces them to different growth models such as Harrod-Domer growth model, Solow model, and Lewis model and the role of human capital, intellectual capital, poverty, technological progress, state and the market in economic growth and development.

Semester-V/VI (DSE-2) : ELECTIVE PAPER NAME - INDUSTRIAL ECONOMICS

The paper, Industrial Economics, offered to Business Economics Honors, semester five, students cover a wider aspects of market structure, market concentration, different exit conditions, entry barriers, mergers and acquisitions, double marginalization and two part tariffs, vertical differentiation, product differentiation, predation, dynamics of social welfare, externalities and patent and copyright protection.

All these topics make student understand about the functioning of market led economy in the competitive industrialized era. The developed countries are the 'Headquarters' where there is no dearth of capital as well as skill. The developing economies like India is in fact 'Factory' where there is abundance of semi-skilled and unskilled labour power. These papers to deal with economic and industrialized setup of globalized world to bring home country on global map.

Semester-V/VI (DSE-3) : ELECTIVE PAPER NAME - INVESTMENT AND RISK MANAGEMENT

The object is to familiarize the student with different investment alternatives, introduce them to the framework of their analysis and valuation and highlight the role of investor.

Semester-V/VI (DSE-5) : ELECTIVE PAPER NAME - INDIAN ECONOMY

The paper, Indian Economy, offered to Business Economics Honours, semester six, students cover a wider aspects of economic reform, liberalization and beyond, global slow down, economy, macro-economic indicators of Indian economy, demographic indicators and social indicators, food and nutritional level, agricultural growth and productivity, food growth and performance, foreign capital and portfolio investment flows and service sector and its role in economic development.

Each unit of the reference make students familiar with the different phases of transformations through which Indian economy has passed and recently reached to the phase where economic and social fields. These units make these students understand why there was policy change from state-led economy to the market led economy. What was the economic reform and what was the impact of global economic crisis and what strategic ways adopted by our policy makers to resolve the crisis situation.

No doubt by studying these papers students get wider perspective to understand and analyze the facts related to macro-economic trends, fiscal trends, sectoral trends and demand the students a wider vision and deeper insight to think and actively work on the issues which are proving as the biggest hurdles in the overall growth and development of the economy.

Semester-V/VI (DSE-7) : ELECTIVE PAPER NAME-INDIAN FINANCIAL MARKETS AND SERVICES

The course aims at providing the students, basic knowledge about the Finance concepts, markets and various services provided in those markets. The syllabus is structured in a way to show the roles of intermediaries and its regulating bodies. The course also provides information about the prevailing financial system in India.

Semester-V/VI (DSE-8) : ELECTIVE PAPER NAME - ADVERTISING & CONSUMER BEHAVIOUR

Target markets are fragmenting as today's consumers are increasingly selective in product choice. Simultaneously, product life cycles are shortening, competition is intensifying. Understanding the consumer buying process can make the difference between success and failure in consumer advertising strategies.

This course focuses on the universal principles of Consumer Behavior-the cultural, social, individual and ethical influences on consumer buying behavior, within the overall framework of consumer decision making. This course places particular emphasis on the conceptual foundations of consumer behavior, and how these variables impact advertising strategy and the theoretical knowledge base. Current examples in advertising, product/service planning, brand management, marketing segmentation, positioning strategy and pricing and distribution and theories throughout the course. In addition, a number of individual, group, and video exercises will be used in the course.

SKILL ENHANCEMENT COURSES (SEC)**Semester-III/IV (SEC-2) : PAPER NAME - INTRODUCTORY RESEARCH METHODS**

This course is much beneficial for students. It gives the opportunity how to deal with research. This basically helps students to know details of conducting future research.

Semester-III/IV (SEC-4) : PAPER NAME - DATA BASE AND STATISTICAL PACKAGES

This course aims at imparting basic knowledge and skills of handling statistical packages such as SPSS and Excel Tool Pak which are soft-wares specially designed to aid in data analysis. Students get a first-hand experience in handling data and applying appropriate data analysis techniques which they learn in theoretical papers on Statistics and Econometrics. In their project works in the remaining semesters, in their research work as well in their professions requiring analytical work.

GENERAL ELECTIVE COURSES –Interdisciplinary

SEMESTER-I (GE1) : PAPER NAME - MICROECONOMICS

This course includes the basics of Microeconomics such as demand and supply analysis, consumer theory, production theory, cost theory and market structure. The understanding of management/economics and also for cost and benefit analysis in corporate organizations. Thus, the scope of this course includes teaching, research in management/economics.

Semester-II (GE2) : PAPER NAME - MACROECONOMICS

The benefits of learning Macroeconomics to students are manifold. It helps students to understand the complex working of the economy and how the level of national employment and supply. Gives insight of fiscal and monetary policy of the country. How RBI functions and keeps a balance between various macroeconomics variables like inflation, Interest rate with rest of the world and what are the implications of interaction on our domestic growth. Thus this subject provides the understanding of the overall working of the economy.

Semester-III (GE3) : PAPER NAME - FUNDAMENTALS OF FINANCE AND ITS APPLICATIONS

The paper aims to help students to appreciate and understand how financial markets and institutions operate. It introduces financial institutions and other market participants interact with each other. A second and equally important objective is to help students to understand commonly used financial instruments and how they work. It also provides Management and Basics of Financial Accounting, further, it enables the students to understand the functioning of various types of financial institutions (Banking companies and contemporary issues. Thus, providing a solid foundation for further study and application of financial knowledge and skills in financial system entirety.

Semester-IV (GE4) : PAPER NAME - INTRODUCTION TO MARKETING MANAGEMENT

The basic purpose of marketing management is to make students understand, how to achieve the objectives of the business. A business aims at earning reasonable profits by satisfying understanding Creation of Demand, Customer Satisfaction, Market Share, Generation of Profits and Creation of Goodwill and Public image. Thus this marketing management paper is important it is to raise the goodwill of the business by initiating image- building activities such as sales promotion, publicity and advertisement, high quality, reasonable price, etc.

4. B.A. (Hons.) in Economics

SEMESTER I

C-1: INTRODUCTORY MICROECONOMICS

This is an introductory paper that teaches the fundamentals of microeconomics, providing students with a solid foundation for economic analysis. The paper begins with an introduction to forces that determine equilibrium in a market economy. Next, it introduces a framework for learning about consumer behaviour and analysis of consumer decisions, going on to optimal production, along with the impact of different market structures on firms' behaviour. By the end of the paper, students are able to understand introductory microeconomics and use these techniques to think about a number of policy questions relevant to the operation of the real economy.

C-2: MATHEMATICAL METHODS FOR ECONOMICS-I

This paper provides the basic mathematical prerequisites for other papers in the Honours, Masters' and Ph.D programs, and the mathematical techniques and methods used by the paper covers number systems, logic and proof techniques, sets and set operations, relations and functions, functions of one real variable, single-variable optimization, integration. The textbook is *Mathematics for Economic Analysis* by Knut Sydsaeter and Peter Hammond. Learning outcomes include the facility to express economic ideas using mathematics, mathematical methods.

GE-1(a) (FOR HONOURS): INTRODUCTORY MICROECONOMICS

The purpose of this paper is to familiarize students with the basic concepts of microeconomics, such as, demand and supply, consumer equilibrium, firm's equilibrium, cost theory. These concepts help students understand the theoretical mechanisms behind the working of markets.

GE-1(b) (FOR HONOURS): ECONOMIC HISTORY OF INDIA (1857-1947)

This paper analyses key aspects of Indian economic development during the second half of British colonial rule. In doing so, it investigates the place of the Indian economy in the global economic development in India to the compulsions of colonial rule. This course links directly to the course on India's economic development after independence in 1947.

SEMESTER II

C-3: INTRODUCTORY MACROECONOMICS

This paper provides an overview of macroeconomic issues, such as determination of national income, output, employment, inflation, interest rate and more. The role of money is introduced. Basic models of macroeconomics are illustrated with the experience of the US and foreign economies. Also, this paper enables students to appreciate the equilibrium in each market; to emphasize the role of macroeconomic policies that affect internal and external deficits. Lastly, the paper introduces the concepts of IS and LM curves, fiscal and monetary policies, and adverse economic shocks on GDP and interest rates.

C-4: MATHEMATICAL METHODS FOR ECONOMICS – II

This paper is a progression from the Mathematical Methods for Economics-I paper and aims to develop understanding and skill in the application of mathematical theorems and techniques. Topics include linear algebra, functions of several real variables, multi-variable optimization, and differential equations. The core textbook is *Mathematics for Economic Analysis*. Outcomes include capability to formulate static and dynamic theoretical models and solving applications in economics, as in production and consumption theory, macroeconomics, and others.

GE 2(a) (FOR HONOURS): INTRODUCTORY MACROECONOMICS

This paper includes topics such as introduction to macroeconomics and national income accounting, money, inflation, and the closed economy in the short run. It helps students understand basic level concepts such as investment, GDP, and balance of payments.

GE 2(b) (FOR HONOURS): INDIA AND INDIAN OCEAN ECONOMY (1500-1800)

This paper covers the rich history of marine trade which India used to have with other countries from times immemorial. It also provides an in-depth knowledge of historical changes and the role of India due to these changes. It gives a detailed description of the goods which were traded, communities involved, the way documents were maintained of transactions, and other things.

SEMESTER III

C-5: INTERMEDIATE MICROECONOMICS – I

This paper broadly includes consumer theory, production theory, cost theory and perfect competition. Thus, this paper covers the essential concepts required for understanding the microeconomic scope of the paper includes high education in economics or management, teaching and research work in the government as well as the corporate organizations.

C-6: INTERMEDIATE MACROECONOMICS – I

This paper is one of the most important core papers in undergraduate honours courses in Economics in the second year. Macroeconomics basically deals with aggregated indicators such as unemployment rate, price indices and also the interrelations among different sectors of the economy to better understand how an entire economy performs. This paper basically covers macroeconomics which study the causes of short run fluctuation (business cycle) in national income, inflation analysis, and open economy macroeconomics. It also emphasizes the inflationary process. The paper provides an in-depth study of fiscal and monetary policies along with commodity, assets and labour markets. It is an interesting paper but there is a lot to be learned from the paper. This paper provides students a strong foundation in macroeconomics so that they can easily grasp the more advanced course in macroeconomics at their post-graduate level.

C-7: STATISTICAL METHODS IN ECONOMICS

This paper is an introductory, though challenging course in basic statistical methods. It prepares students in utilizing statistical techniques for quantitative, data-based problem to understand econometrics courses at the Honours and Masters levels. Topics include elementary probability theory, random variables and probability distributions, random sampling, point and interval estimation. The core textbook is *Probability and Statistics for Engineers* by Jay Devore. Learning outcomes include developing proficiency for stat and industry.

GE-3(a) (FOR HONOURS): INDIAN ECONOMY-I

This course examines sector-specific policies and their impact in shaping trends in key economic indicators in India. It highlights major policy debates and evaluates the Indian development since independence, population and human development, growth and distribution, and international comparisons.

GE-3(b) (FOR HONOURS): MONEY AND BANKING

This course provides a general idea to the students regarding the theory and functioning of the monetary and financial sectors of the economy. It focuses special attention to rational instruments of monetary control. It also provides an insight into financial and banking sector reforms and monetary policy with special reference to India. To enable students to understand concepts, functions and theories of money demand supply, structure and role of financial markets, the financial innovations which have taken place over a period of time along with banking reforms which have taken place from time to time. It also makes students aware about functions, balance sheet, goals, targets, indicators and instruments of monetary

SEC 1: RESEARCH METHODOLOGY

This course is designed to help undergraduate students appreciate, learn and practice data-based research skills that will help them in writing term papers, and project reports. This course gives an outline as to how to identify nature of research, formulation of research topic, review of literature, approaches to research and research strategy, research ethics, to use sample selection methods, analysis of data, and writing of project report, with reference to different styles.

SEMESTER IV

C-8: INTERMEDIATE MICROECONOMICS – II

This paper broadly covers general equilibrium theory, game theory, welfare analysis, market structures, externalities and asymmetric information. The paper provides in-depth higher education in economics and also for making policy decisions. Thus, the scope of the paper includes teaching, research work and policy decision making.

C-9: INTERMEDIATE MACROECONOMICS-II

This paper aims to provide students with a solid understanding of macroeconomics at the intermediate level, and to ensure that they can apply macroeconomic analysis to the unemployment, budget deficit and many more. In this paper, the modern theories of the determination of consumption, investment, demand for money, steady state levels and the implications of each model/ theory on alternate fiscal and monetary policy seeking to facilitate full employment, economic growth and price stability are discussed. Students are familiarized with current macroeconomic data and its relevance.

C-10: INTRODUCTORY ECONOMETRICS

This paper broadly includes review of some statistics concepts, simple regression analysis, multiple regression analysis and violation of classical assumptions. This paper provides empirical work which is commonly done in corporate organizations, research institutions and macroeconomic decision making. Thus, this paper has a very wide scope in all services among others.

GE 4(a): INDIAN ECONOMY-II

Using appropriate analytical frameworks, this paper reviews major trends in economic indicators and policy debates in India in the post-Independence period, with particular emphasis on the growth process. Given the rapid changes taking place in India, the paper gives an insight into economic development which has taken place since independence, in terms of structural changes, growth, and employment. It talks about demographic trends and issues, education, health and malnutrition, policies towards poverty, inequality, and unemployment. It provides information on these issues in an international comparison to give a wider outlook to students.

GE 4(b): PUBLIC FINANCE

Public Finance as a subject for undergraduate students is very important in the highly competitive world. Given the limited resources and unlimited demand and desires, the state should use the funds of the public. The paper includes topics such as public goods, budget and some of the latest tax reforms. All this helps the student to understand the working of public finance and thus makes them capable of evaluating the pros and cons of public policies.

SEC2: CONTEMPORARY ECONOMIC ISSUES

This paper seeks to familiarize students with basic concepts related to some contemporary economic issues of India. Its aim is to equip students with sufficient knowledge and skills to critically analyze contemporary issues that figure in high-profile government documents, in particular, The Economic Survey and The Union Budget. Such capability is necessary to increase peoples' participation in economic decision making. The paper also helps to relate the theoretical frameworks of Microeconomics and Macroeconomics to the Indian context and the treatment of Indian Economy related issues. The emphasis of this paper is however, more towards understanding of the concepts and not data analysis.

SEMESTER V

C-11: INDIAN ECONOMY – I

Using appropriate analytical frameworks, this paper reviews major trends in economic indicators and policy debates in India in the post-independence period, with particular emphasis on the growth process. Given the rapid changes taking place in India, the paper gives an insight into economic development which has taken place since independence, in terms of structural changes, growth, and employment. It talks about demographic trends and issues, education, health and malnutrition, policies towards poverty, inequality, and unemployment. It provides information on these issues in an international comparison to give a wider outlook to students.

C-12: DEVELOPMENT ECONOMICS – I

Development Economics is a vibrant paper concerned with processes of change such as social and economic, political and cultural and many major policy challenges that present themselves especially in the developing countries. It helps students understand the reasons for why some countries are rich and others so poor; enables them to factor out and remedy significant causes and equip them to create flourishing ground for the same. Hence, the paper provides a stable interdisciplinary social science formation and develops students' capacities for innovation. In the backdrop in which the under-developed and developing countries coexist with the relatively more developed world, this paper in particular, begins with basic demographic concepts and development. A changing demographic structure put across the unique pattern of inputs markets and contracts in developing countries is then comprehensively studied to bring out the development attributes. These character-traits are then linked to the particular problems of enforcement experienced in these countries. With an aim of further concretizing the concepts and organizations is premeditated and linked to the questions of sustainable development. Finally, setting the pace for sustainability, the paper ends with reflections on the role of the state and dependence on the process of development.

DSE 1: APPLIED ECONOMETRICS

This paper is an extension to the Introductory Econometrics compulsory paper of Semester IV. The course is specifically designed for students who are keen to pursue empirical research. It includes matrix approach to linear regression model, review of functional forms and qualitative explanatory variable regression models, regression diagnostics: detection of, and correction for, autocorrelation, heteroscedasticity, model selection, dynamic econometric models, instrumental variable estimation, simultaneous equations model, panel data models and applications of econometric software. Thus, qualifying this paper considerably adds to the profile of the student applying for jobs in the corporate and government organisations, research institutions and higher education.

DSE 2: INTERNATIONAL ECONOMICS

The paper on International Economics is well prepared for students of third year undergraduate honors programme. It includes classical and new theories of international trade and on the other hand introduces open economy macroeconomics dealing with exchange rate determination in presence of 'expectation' and different policies to maintain equilibrium. The text book is authored by Noble laureate Paul Krugman and Maurice Obstfeld. This is an optional paper but given the content it is observed that most of the students of fifth semester are studying the paper as it gives them an opportunity to understand and analyse the real-world trade related issues. They score well both in internal assessment as well as in end semester examination. Economics students find it easier to understand the advanced course in International economics having their strong foundation attained through this course.

DSE 3: PUBLIC ECONOMICS

Public economics is the study of government policy from the points of view of economic efficiency and equity. The paper deals with the nature of government intervention and stabilization. Inherently, this study involves a formal analysis of government taxation and expenditures. The subject encompasses a host of topics including public goods, market failures, etc. The paper is divided into two sections, one dealing with the theory of public economics and the other with the Indian public finances.

SEMESTER VI

C-13: INDIAN ECONOMY – II

This paper examines sector-specific policies and their impact in shaping trends in key economic indicators in India to the third-year students in their sixth semester. It highlights empirical evidence. Given the rapid changes taking place in the country, the course gives an insight into macroeconomic policies and their impact, policies pursued and the performance of the economy over a period of time. It also throws light on the trends and performance in the services sector in terms of its growth, productivity, diversification, competition policy, etc. The purpose of the paper is to provide a more comprehensive view of the economy, making them more aware about the economic activities taking place around them.

C-14: DEVELOPMENT ECONOMICS – II

This is the second module of the economic development sequence. It begins with basic demographic concepts and their evolution during the process of development. The structure of the economy and particular problems of enforcement experienced in poor countries. The governance of communities and organizations is studied and this is then linked to questions of sustainable development, the role of globalization and increased international dependence on the process of development. This paper is offered to the third-year students in sixth semester.

DSE 4: ENVIRONMENTAL ECONOMICS

This paper focuses on the problems of our natural environment through the lens of economic theories and applications. It provides economic theorems and their applications in the real world that if we do not do anything soon about it, then we stand to lose a lot in the near future. It also suggests different ways through which sustainable development can be achieved in a world of environmental scarcity. The purpose of the paper is to make students more aware about the problems faced by the policy makers in terms of environment and at the same time ensuring that economic growth does not get hampered. It encourages students to give more thought to environmental issues and try to work in the required direction to ensure that environmental problems are taken care of, which are not only environmentally viable, but also economically sustainable.

DSE 5: FINANCIAL ECONOMICS

This paper introduces students to the economics of finance which involves inter temporal decision making in the financial domain in the presence of uncertainty, risk and asymmetric information. The paper is divided into two sections, namely, investment theory and portfolio analysis; options and derivatives; and corporate finance. The first two sections comprise of some of the basic models used to value assets and derivatives; these include the CAPM, and the binomial option pricing models. The paper ends with a brief introduction to patterns of corporate financing, capital structure and dividend policy. The concepts of microeconomics, differential equations, probability and statistics are a pre-requisite to this paper. The paper prepares students for related jobs in the financial industry and important personal financial decisions such as taking out a mortgage, purchasing insurance, or saving for a pension.

DSE 6: MONEY AND FINANCIAL MARKETS

This is a paper on the economics of money, banking and financial markets. It provides coverage of economic principles that underlie the operation of banks and other financial institutions with an introduction to the role of money, financial markets, financial institutions and the monetary policy in the economy, thus providing a solid foundation for further study. The paper establishes how monetary policy and the financial markets work in theory and practice. The main components of the course are cover the role of financial markets in the determination of interest rates and interest rate determination, the main aspects of banks and other financial institutions and the role of money, central banking and monetary policy.

5. B.A. (Prog.) with Economics

SEMESTER I

C - I: PRINCIPLES OF MICROECONOMICS – I

This paper introduces students to the basic concepts in microeconomics. The objective of the paper is to analyze how individual decision makers, both consumers and producers, make their decisions. Students are introduced to the definition and basic concepts of microeconomics theory, such as consumer theory, production and costs, market structures, income distribution and others. Specifically, the course describes the essential elements of microeconomics from a theoretical and analytical point of view.

SEMESTER II

C - II: PRINCIPLES OF MICROECONOMICS – II

This is a sequel to Principles of Microeconomics–I covered in the first semester. The objective of the paper is the same as in Principles of Microeconomics-I, giving an insight into producer theory, along with international trade, and income distribution and factor pricing.

SEMESTER III

C - III: PRINCIPLES OF MACROECONOMICS – I

This paper introduces students to the basic concepts in Macroeconomics that deals with the aggregate economy. Students are introduced to the definition and measurement of national income, savings, investment, and balance of payments. The paper also discusses various theories of determining GDP in the short run.

SEC-I: UNDERSTANDING THE ECONOMIC SURVEY AND UNION BUDGET

This paper seeks to introduce students to concepts related to the Economic Survey and Union Budget, as also the contemporary themes in India's development. Topics include climate change. An in depth understanding of this paper helps students appreciate and contribute to reports, government documents and media discussions.

SEMESTER IV

C-IV: PRINCIPLES OF MACROECONOMICS–II

This paper is a sequel to Principles of Macroeconomics–I, analyzing various theories of the determination of national income in greater detail. It also introduces students to the concepts of unemployment, and some basic concepts in an open economy.

SEC-II: RESEARCH METHODOLOGY

This paper helps students learn the introductory research skills in writing data-based term papers, and project reports, Introduction to the nature of research, formulation of the types of data help increase the suitability of students for research based work in the corporate sector, government institutions and media.

SEMESTER V

C-V: ECONOMIC DEVELOPMENT AND POLICY IN INDIA – I

This course reviews major trends in aggregate economic indicators in India and places these against the backdrop of major policy debates in India in the post-independence period. It covers issues in growth, development, and sustainability, factors responsible for development, demographic and urbanization trends, and occupational structure in organized and unorganized sectors. It also covers development experience in terms of poverty, competitiveness, reforms, savings, investment, monetary and fiscal policies, and financial relations between centre and state. The objective is to give students a clear view of the issues at hand, and to make them aware of the current burning issues facing the Indian economy.

GE 1 (FOR B.A./B.COM. PROGRAMME): PRINCIPLES OF MICROECONOMICS

This paper is designed to expose students to the basic principles of microeconomic theory, introducing them to topics such as basic demand, supply tools, and the implications of consumer and producer behavior, production and cost analysis, market structure, and labor market theory. By the end of the paper, students are well acquainted with the principles of the theory and how they can be used in its applications of the real world.

SEC-III: DATA ANALYSIS

This paper is the first step to learn how to make sense of piles of data using graphical and numerical measures. It introduces students to the collection and presentation of data, and how to analyze it for drawing statistical inferences. Students are trained how to use important data sources using statistical tools which are useful for further research in economics.

SEMESTER VI

C-VI: ECONOMIC DEVELOPMENT AND POLICY IN INDIA –II

Building on the more aggregative analysis of trends in the Indian Economy offered in Economic Development and Policy–I, this paper examines sector-specific trends in key Indian industries during the independence period, with special focus on policies and performance of agriculture, industry and foreign trade.

GE-2 (FOR B.A./B.COM. PROGRAMME): PRINCIPLES OF MACROECONOMICS

This paper introduces students to macroeconomic fundamentals and concepts, theories and applications with regard to variables such as GDP, consumption, savings, investment, etc. Students can apply the basic principles learnt from this paper in understanding the functioning of the aggregate economy, and in contributing to policy debates.

6. B.A. (Hons.) in English

Course Objective – The English Honours Core Courses look at some of the fundamental questions of world literature by offering the students an opportunity to engage with a work written or translated in English. The prescribed syllabi for English Honours has widened considerably in scope to accommodate newer areas such as World Literatures, Postcolonial Literatures, Women's Writing, in balance with the more canonical branches of study. The students of the English Honours discipline are required to study **fourteen compulsory core papers**; the papers are as listed below:

1st Semester:

C1. Indian Classical Literature: This paper offers a cumulative overview of Indian epic tradition, Natyashastra and other Indian classics, including the Tamil epic tradition, and the works of Kalidasa and Valmiki.

C2. European Classical Literature: The objective of this course is to orient students in the Graeco-Roman Epic tradition and the theory and origin of Classical Tragedies and Comedies, including Sophocles, and Plautus.

2nd Semester:

C3. Indian Writing in English: This paper is an attempt to find traces of both the Indian socio-historic contexts and themes of modernism and aesthetics in the writings of Indian authors in a colonial language. Some of the prominent writers included are R.K. Narayan, Anita Desai, Kamala Das, Robin S. Ngangom, Salman Rushdie, Rohinton Mistry and Shashi Deshpande.

C4. British Poetry and Drama: 14th to 17th Centuries: The paper is designed to ground students in the emerging ideal of Renaissance Humanism, the courtly Petrarchan tradition, and the distinguished corpus of Shakespearean Tragedies and Comedies. The writers in focus are Geoffrey Chaucer, Edmund Spenser, Christopher Marlowe, John Donne and William Shakespeare.

3rd Semester:

C5. American Literature: This paper acquaints students with a distinct American literary tradition. The early protestant poetry of Anne Bradstreet, the prose/fiction developed by Hawthorne, Faulkner, the transcendentalism of Walt Whitman, the historical exploration of the institution of slavery through a neo-slave narrative by Toni Morrison, the questioning of the status of women, and some of the noticeable aspects of this paper.

C6. Popular Literature: Lending the course a broader inclusiveness, this paper is an attempt to expand the study of literature beyond the canonical. Agatha Christie's whodunit reflected in Lewis Carroll's novel, the Graphic Novel tradition as portrayed in *Bhimayana* and the new perspectives on Gender/caste as seen in Shyam Seladurai's text are the key

C7. British Poetry and Drama: 17th and 18th Centuries: Weaving its way through the complex deployment of biblical metaphors in John Milton's secondary epic, the Neo-classical in Alexander Pope, the Jacobean dramatic tradition in John Webster's women-centric tragedy and Aphra Behn's exploration of women's roles in the seventeenth century, this paper is set within the specified historical context.

4th Semester:

C8. British Literature: 18th Century: Through a provocative array of texts by writers like William Congreve, Jonathan Swift and Laurence Sterne, this paper stimulates students of the 18th century.

C9. British Romantic Literature: This paper exposes learners to such thematic strands as the Romantic theory of Imagination, the spirit of Revolution and individuality and an aesthetic trajectory produced by William Wordsworth, Samuel Taylor Coleridge, Percy Bysshe Shelley, Lord Byron, William Blake and Mary Shelley.

C10. British Literature: 19th Century: This paper offers students an understanding of the socio-historical and literary landscape of the nineteenth century. Through the novels and plays, students examine issues like capitalism and industrialism, the denial of sexuality and voice to women, and the existence of racism and colonialism. The poetry of Robert Browning is an important section of the paper.

5th Semester:

C11. Women's Writing: This paper locates itself in the emerging shift in women's studies from feminism to feminisms, with a study of women writers from diverse locations and times. Alice Walker, Eunice De Souza, Charlotte Perkins Gilman, Katherine Mansfield, Mahashweta Devi, Mary Wollstonecraft, Ramabai Ranade and Rassundari Debi, encouraging students to explore caste and gender.

C12. British Literature: The Early 20th Century: Through the novels of Joseph Conrad, D.H. Lawrence and Virginia Woolf, this paper unfolds against the backdrop of empire, the movements and Freudian psychoanalysis. The poetry segment offers a close look, through the work of W.B Yeats and T.S Eliot, at Modernism, uses of myth in a modern world, and the

6th Semester:

C13. Modern European Drama: The paper offers an overview [keeping in mind the performative aspects] of Epic Theatre, Realism, Naturalism, Avant Garde, New Parisian Theatre produced by Henrik Ibsen, Bertolt Brecht, Samuel Beckett and Eugene Ionesco.

C14. Postcolonial Literatures: The paper endeavours to present contemporary concerns like Colonization and De-colonization, politics of language, importance of orality in the themes of region, race, and above all, the need to find a new form and language of resistance.

The course aims to prepare the students for a variety of academic writing and reading tasks by honing their critical research abilities. Students' understanding of these papers is reinforced through discussions in lectures, tutorials, class tests, written assignments or presentations.

English (Honors) Discipline Specific Elective (DSE)

Course Objective – Discipline Specific Elective (DSE) papers help the students of English Honours to further streamline their research skills by electing four optional papers in the English Honours program.

The Discipline Specific Electives are designed to enhance the grasp on genres, histories, forms and social concerns of literatures from around the world, as they negotiate their way through contemporary texts. The papers offer a more focussed study of the literature of the Indian subcontinent and the Indian Diaspora, Modern Indian Writing in English Translation, emphasis is laid on building a competent theoretical understanding particularly useful for further academic and research pursuit through papers like Literary Theory, Research papers have been offered by the department in the last five years:

5th Semester:

- **Literature of the Indian Diaspora**
- **Modern Indian Writing in English Translation**
- **Literary Criticism**
- **Science Fiction and Detective Literature**

6th Semester:

- **Partition Literature**
- **Literary Theory**
- **World Literature**
- **Autobiography**
- **Research Methodology**

General Elective (GE)- for Honours and B.A./B.Com. Programme

Course Objective– This is an elective course chosen from an unrelated discipline/subject. The Department offers a variety of papers in the present Generic Elective course to students have discipline/subject other than English.

A paper like **Contemporary India: Women and Empowerment** enables students to understand social practices of gender formation and offers a conceptual initiation into feminist sociological, legal and literary readings, students are guided towards a more nuanced understanding of gendered practices. **Readings on Indian Diversities and Literary Movements** of literatures in India, its linguistic diversity and the continuing language debates.

The prevalent influence of evolving technologies like mass media and social media is undeniable in our lives. A paper like **Media and Communication Skills** provides a competent

Language, Literature and Culture and **Text and Performance** papers are designed to provide a focalized introduction to theories of Textual-Linguistic-Cultural Studies, and perform

The division of the papers, spread through the semesters, are as listed below:

1st Semester: Contemporary India: Women and Empowerment –OTHER HONS.

2nd Semester: Media and Communication Skills –OTHER HONS.

3rd Semester: Text and Performance

Academic Writing and Composition-- OTHER HONS.

4th Semester: Language, Literature and Culture-- OTHER HONS

5th Semester: Contemporary India: Women and Empowerment—BA/BCOM PROG.

6th Semester: Readings on Indian Diversities and Literary Movements—BA/BCOM PROG.

7. B.A./ B.Com. (Prog.) With English Core – taught in two Semesters

Course Objective: The Core Language Course in English is a three-tiered structure, addressing different levels of language learning in School. There are three streams- **A, B and C**, XII, X and VIII respectively. This Course aims to enhance the proficiency in the skills of **Listening, speaking, Reading and Writing** and test these skills through a constant monitor rather than a prescribed textbook.

English Discipline course- for BA Programme

Course Objective: This course is offered only to those students who take Discipline English as one of their subjects in BA Programme. The course is meant to acquaint the student learning objectives are to enhance the literary component and an understanding of various genres and literary ages, ability to critically analyse texts and engage in academic discussion.

1st Semester: Individual and Society

2nd Semester: Selections from Modern Indian Literature: Poems and Short Stories

3rd Semester: DSC1.C—British Literature, Novel and Play

4th Semester: DSC1D—Literary Cross-currents: Selections from Living Literature, Novella and Play

5th Semester: DSC1E—Modern Drama

6th Semester: DSE2. World Literature

Skill Enhancement Course- For BA Programme and English (Hons.)

Course Objective: The skill enhancement courses (or Ability enhancement Elective Course) are designed to provide value-based and skill-based knowledge and aimed at providing to make the students enlarge their skill set for greater employability. The pedagogy used in the teaching of these courses also goes beyond the traditional text-based approach to a more task-based than text-based wherein the students' proficiency is monitored at regular intervals.

**3rd Semester: Creative Writing, Book and Media Reviews—BA PROG
Translation Studies—ENGLISH HONS**

**4th Semester: Translation Studies—BA PROG
Creative Writing, Book and Media Reviews—ENGLISH HONS**

5th Semester: Technical Writing -- BA PROG

**6th Semester: Business Communication—BA PROG
English Communication as Ability Enhancement Compulsory Course (AECC)**

Course Objective-The Communicative Language Course in English is a three-tiered structure. There are **three streams- A, B and C- offered to students of honours and programme and VIII respectively.** The purpose of this course is to introduce students to the theory, fundamentals and tools of communication and to develop in them vital communication and professional interaction. The present course aims to address these aspects through an interactive mode of teaching-learning process and by focusing on various dimensions personal, professional and social context like interviews, dialogue/ conversation, group discussion; reading skills through reading comprehension as well as writing skills tested

There is no prescribed textbook and the recommended readings provided by the University are only suggestive which provides freedom to teachers and students to consult a variety of sources for an interactive and dialogic teaching-learning method.

8. B.A. (Hons.) in Hindi

सेमेस्टर-1

प्रश्नपत्र-1: हिंदी भाषा और उसकी लिपि का इतिहास

यह प्रश्नपत्र छात्रों के भाषा संबंधी ज्ञान को बढ़ाने वाला है। उन्हें इस की जानकारी प्रदान करता है कि हमारी लिपि पुराने समय में किस प्रकार की थी और वह कितनी वैज्ञानिक है।

प्रश्नपत्र-2 : हिंदी कविता (आदिकाल एवं भक्तिकालीन काव्य)

यह प्रश्नपत्र 500 -600 वर्षों की हिंदी कविता पर प्रकाश डालता है जो संस्कृति और सभ्यता के ज्ञान को बढ़ावा देने वाला है। हमारे मूल्यों की धरोहर ये कविताएं हैं।

सेमेस्टर-2

प्रश्नपत्र-3 : हिंदी साहित्य का इतिहास(आदिकाल और मध्यकाल)

प्रस्तुत प्रश्नपत्र हिंदी साहित्य के इतिहास का क्रमवार विवेचन करता है जो आदिकाल और मध्यकाल की प्रमुख प्रवृत्तियों पर प्रकाश डालता है।

प्रश्नपत्र-4 : हिंदी कविता (रीतिकालीन काव्य)

रीतिकालीन कविता काव्यशास्त्र की समझ को मजबूत करने के लिए महत्वपूर्ण है इसके साथ ही 1700-1900तक की काल की कविता की बनावट को चिन्हित करती है।

सेमेस्टर-3

प्रश्नपत्र-5 : हिंदी साहित्य का इतिहास (आधुनिक काल)

हिंदी साहित्य का आधुनिक काल परिवर्तनों का काल है। यह प्रश्नपत्र खड़ी बोली गद्य के विकास और नई कविता के विकास का परिचय देता है।

प्रश्नपत्र -6 हिंदी कविता (आधुनिक काल से छायावाद तक)

प्रस्तुत प्रश्नपत्र भारतेंदु युग से छायावाद युग तक कविता को चिन्हित करता है इन काल खंडों में कविता ब्रजभाषा की गोद से निकलकर शुद्ध खड़ी बोली में रची जाने लगी।

प्रश्नपत्र -7 हिंदी कहानी

हिंदी कहानी का यह प्रश्नपत्र 4 इकाइयों में विभिन्न काल खंडों की कहानियां संजोये हुए है इसमें प्रेमचंद की पूस की रात से लेकर ओमप्रकाश वाल्मीकि की घुसपैठिये कहानी संकलित है ये कहानियां समाज और

सेमेस्टर-4

प्रश्नपत्र -8 भारतीय काव्यशास्त्र

प्रस्तुत प्रश्नपत्र भारतीय काव्यशास्त्र की परंपरा को समझने में सहायक है जो साहित्य के स्वरूप और भारतीय आलोचना शास्त्र की तात्विक दृष्टि से छात्रों को अवगत कराता है।

प्रश्नपत्र -9 हिंदी कविता (छायावाद के बाद)

यह प्रश्नपत्र आधुनिक कविता की बनावट से छात्रों को अवगत कराता है इस प्रश्नपत्र की कविताएँ छात्रों के दिमाग में रोशनी पैदा करने वाली हैं। ये कविताएँ आज की जीवनशैली में व्यक्ति को मनुष्य बनाये र

प्रश्नपत्र -10 हिंदी उपन्यास

हिंदी उपन्यासों की यह कड़ी मानव जीवन की कठिनाइयों को परत दर परत खोलने में सक्षम है ये उपन्यास छात्रों में धैर्य और मुश्किल समय में जीवन की दिशा सुझाने में सक्षम हैं।

सेमेस्टर 5

प्रश्नपत्र -11 पाश्चात्य काव्यशास्त्र

यह प्रश्नपत्र पाश्चात्य काव्यशास्त्र के विद्वानों की मान्यताओं का उल्लेख करता है यह अरस्तू, लॉजाइनस, कालरिज, इलियट के साहित्य सिद्धान्तों के सम्बन्ध में छात्रों को दृष्टि प्रदान करता है और विश्व सा

प्रश्नपत्र -12 हिंदी नाटक/एकांकी

नाटक और एकांकी का यह प्रश्नपत्र देश के परतंत्रता की बेड़ियों का उल्लेख करता है, ध्रुवस्वामिनी नाटक स्त्रियों की दृष्टि से प्रसाद जी का बेहद सशक्त नाटक है अन्य नाटक और एकांकी भी सामाजिक, राजनी

सेमेस्टर 6

प्रश्नपत्र -13 हिंदी आलोचना

हिंदी आलोचना का प्रश्नपत्र हिंदी साहित्य के अवधारणात्मक स्वरूप को व्याख्यायित करता है साथ ही उन कमियों के संदर्भों को भी दिशा निर्देशित करता है जो जाने -अनजाने समर्थ साहित्य के साथ जुड़ गई है

प्रश्नपत्र -14 हिंदी निबंध और अन्य गद्य विधाएं

इस प्रश्नपत्र में निबंध के अतिरिक्त जीवनी, आत्मकथा, संस्मरण, रेखचित्र जैसी गद्य विधाओं को जोड़ा गया है यह छात्रों के वैचारिक और समग्र विकास के लिए महत्वपूर्ण प्रश्नपत्र होगा। ऐसे विषय छात्रों को जि
हिंदी सामान्य (Generic) ऐच्छिक पाठ्यक्रम

सेमेस्टर : 1

1 (a) लोकप्रिय साहित्य, अथवा (b) हिंदी सिनेमा और उसका अध्ययन

लोकप्रिय साहित्य - इस प्रश्नपत्र में बताया गया है कि लोकप्रिय साहित्य किसे कहते हैं। कैसे उपन्यास लोकप्रिय बने तथा किस प्रकार की कविता और कवि को लोकप्रिय माना गया। वास्तव में लोकप्रिय साहित्य

हिंदी सिनेमा और उसका अध्ययन - यह ऐच्छिक पाठ्यक्रम है जिसे दूसरे आनर्स के छात्र अपनी इच्छा से चुनते हैं। 'हिंदी सिनेमा और उसका अध्ययन' प्रश्नपत्र में सिनेमा को कला विधा के रूप में पढ़ाया जाता है। क्षेत्र में छात्रों की अभिरुचि जगाने वाला है।

सेमेस्टर -2

2. (a) रचनात्मक लेखन, अथवा (b) पटकथा तथा संवाद लेखन

रचनात्मक लेखन - इस प्रश्नपत्र के द्वारा विद्यार्थियों की रचनात्मक क्षमता को दिशा देने का प्रयास किया गया है ताकि वे अपने भाव एवं विचार को अभिव्यक्ति दें सकें और लेखन के विविध क्षेत्रों से अवगत हो सकें।
पटकथा तथा संवाद लेखन - इस प्रश्नपत्र का उद्देश्य हिंदी भाषा-भाषी विद्यार्थियों को पटकथा के क्षेत्र से अवगत कराना है। फिल्मों, धारावाहिक का संवाद लेखन किस प्रकार किया जाता है, संवादों की सैद्धान्तिक आधारों के लिए नये रास्ते खोलने वाला है।

सेमेस्टर-3

3. (a) हिंदी में व्यवहारिक अनुवाद, अथवा (b) भाषा और समाज

हिंदी में व्यवहारिक अनुवाद - इस प्रश्नपत्र में अनुवाद के महत्व को समझाया गया है। अनुवाद की व्यवसायिक संभावनाएं क्या हैं। ज्ञान - विज्ञान और सामाजिक विज्ञान के क्षेत्र में कैसे अनुवाद व्यवहार की आवश्यकता महत्वपूर्ण है।

भाषा और समाज - भाषा और समाज का अंतःसंबंध क्या है भाषा का समाजशास्त्र क्या है, भाषा और समाज की कड़ियाँ कैसे एक-दूसरे जुड़ी हैं - इन सारे प्रश्नों की पड़ताल यह प्रश्नपत्र करता है। जो भारत जैसे बहुभाषी देश में भाषा और समाज का अंतःसंबंध क्या है भाषा का समाजशास्त्र क्या है, भाषा और समाज की कड़ियाँ कैसे एक-दूसरे जुड़ी हैं - इन सारे प्रश्नों की पड़ताल यह प्रश्नपत्र करता है। जो भारत जैसे बहुभाषी देश में भाषा और समाज का अंतःसंबंध क्या है भाषा का समाजशास्त्र क्या है, भाषा और समाज की कड़ियाँ कैसे एक-दूसरे जुड़ी हैं - इन सारे प्रश्नों की पड़ताल यह प्रश्नपत्र करता है।

सेमेस्टर -4

4. (a) हिंदी का वैश्विक परिदृश्य, अथवा (b) भाषा शिक्षण

हिंदी का वैश्विक परिदृश्य - हिंदी का विश्व सन्दर्भ क्या है, संयुक्त राष्ट्र में हिंदी की स्थिति क्या है, जैसे मुद्दों को इस प्रश्नपत्र में उठाया गया है। चूँकि भारत एक अधिक जनसंख्या वाला देश है और बहुराष्ट्रीय कंपनियों का अतः छात्रों को इसकी जानकारी प्राप्त होना चाहिये।

भाषा शिक्षण - इस कोर्स के अंतर्गत मातृभाषा, द्वितीय भाषा और विदेशी भाषा के शिक्षण में अंतर को समझाया गया है। भाषा शिक्षण के सामाजिक और राष्ट्रीय सन्दर्भ भी बताए गए हैं, विद्यार्थियों को भाषा के अंतर्गत मातृभाषा, द्वितीय भाषा और विदेशी भाषा के शिक्षण में अंतर को समझाया गया है। भाषा शिक्षण के सामाजिक और राष्ट्रीय सन्दर्भ भी बताए गए हैं, विद्यार्थियों को भाषा के अंतर्गत मातृभाषा, द्वितीय भाषा और विदेशी भाषा के शिक्षण में अंतर को समझाया गया है।

हिंदी विषय आधारित ऐच्छिक पाठ्यक्रम (HDSEC)

सेमेस्टर-5

1.(a) अस्मितामूलक विमर्श और हिंदी साहित्य, अथवा (b) हिंदी की मौखिक और लोक साहित्य परंपरा

अस्मितामूलक विमर्श और हिंदी साहित्य- इस विमर्श में दलित विमर्श, स्त्री विमर्श और आदिवासी विमर्श समाहित हैं। कथा साहित्य और कविताओं के द्वारा इन विमर्शों को जीवंत स्तर पर बताने का जीवन मूल्यों पर आधारित हैं विद्यार्थियों के लिए इनका पठन-पाठन आवश्यक है।

हिंदी की मौखिक और लोक साहित्य परंपरा- इस प्रश्नपत्र में हमारे देश की लोकसाहित्य की परंपरा पर प्रकाश डाला गया है। भावी पीढ़ी साहित्य की इन विशेषताओं से अवगत हो इसके लिए इसमें इस देश की बहुरंगी संस्कृति इस साहित्य में अपनी झलक देती है। संस्कार से संबंधित गीत एवं नाटकी, बिदेशिया इत्यादि इसमें समाहित किये गए हैं।

2. हिंदी भाषा का व्यावहारिक व्याकरण- इस प्रश्नपत्र के तहत हिंदी भाषा का व्याकरणिक अध्ययन किया गया है। इस अध्ययन सामग्री का मनन विश्लेषण करने से हिंदी प्रयोग की तकनीक पर विद्यार्थियों को साथ हिंदी भाषा के क्षेत्र में अपनी पैठ बना सकते हैं।

सेमेस्टर-6

3. लोकनाट्य- इस प्रश्नपत्र में लोकनाटक की अवधारणा और स्वरूप पर प्रकाश डाला गया है। कुछ प्रमुख लोक नाटकों के द्वारा विद्यार्थियों को इनके पाठ तथा इनकी रचनागत विशेषताओं को समझाने का प्रयत्न संस्कृति के प्रति जागरूक करते हैं।

4. अवधारणात्मक साहित्यिक पद- इस पाठ्यक्रम का उद्देश्य विद्यार्थियों को भारतीय और पश्चिमी साहित्य की आलोचना के विशिष्ट पारिभाषिक शब्दों से परिचित कराना है। इसमें भारतीय और विस्तृत जानकारी प्राप्त की जा सकेगी तथा आलोचना की सैद्धान्तिका का ज्ञान प्राप्त हो सकेगा। यह प्रश्नपत्र विद्यार्थियों की विश्लेषणात्मक क्षमता को निखारने वाला है।

अथवा

5. शोध -प्राविधि- इस विषय -वस्तु के अंतर्गत छात्रों के मस्तिष्क में शोध के कितने स्तर होते हैं और एक बेहतर शोधार्थी के लिए क्या आवश्यक है-जैसे गंभीर प्रश्नों की पड़ताल की गई है। शोध यह उम्मीद की जा सकती है कि वे एक सही दिशा में राष्ट्र और समाज को आगे ले जा सकते हैं। अतएव यह तृतीय वर्ष के छात्रों के लिए मूल्यपरक होगा।

अथवा

6. हिंदी रंगमंच- इस प्रश्नपत्र में भारतीय और पाश्चात्य संस्कृति को परोया गया है। जिसमें पारसी थियेटर, पृथ्वी थियेटर, नाटकी, रामलीला का परिचय दिया गया है। प्रमुख रंगव्यक्तित्व जैसे -शंकर भिखारी ठाकुर की रंगदृष्टि की समीक्षा की गई है। यह विषय विद्यार्थियों की रंग क्षमता को निखारने वाला है।

हिंदी कौशल -संवर्द्धक ऐच्छिक पाठ्यक्रम (HSEC)

(कोई दो : क और ख वर्ग से एक-एक का चयन)

सेमेस्टर-3

(क) विज्ञापन और हिंदी भाषा : इस प्रश्नपत्र के अंतर्गत विज्ञापन के सामाजिक तथा व्यावसायिक उद्देश्यों पर प्रकाश डाला जाता है। विज्ञापन मूलरूप में किस प्रकार का होना चाहिये एवं विज्ञापन की भाषा कैसे चयन करायी जाती है। आज बाजार के युग में छात्रों के लिए विज्ञापन के क्षेत्र में असीम संभावनाएं हैं, अतः विज्ञापन की दुनिया के सन्दर्भ छात्रों के आवश्यक हैं।

सेमेस्टर-4

(ख) कार्यालयी हिंदी : इस अध्ययन विषय के अंतर्गत हिंदी के कार्यालयी स्वरूप की जानकारी छात्रों को प्रदान की जाती है। चूंकि हमारे देश में कार्यालयों में अधिकांश कार्य अंग्रेजी भाषा में होते हैं जिससे जनसामान्यों में कार्यालयी कार्यों के निष्पादन से है ताकि छात्र इन विभिन्न कार्यों के प्रकारों से अवगत हों।

9. B.A. / B.Com. (Prog.) with Hindi

सेमेस्टर -1

1.1 हिंदी भाषा और साहित्य का इतिहास (Core Course-1)

प्रस्तुत प्रश्नपत्र में हिंदी भाषा की बनावट और बुनावट पर प्रकाश डाला गया है इसके साथ ही हिंदी साहित्य के इतिहास के विभाजन को क्रमशः कालक्रमानुसार विद्यार्थियों को पढ़ने के लिए निर्देशित किया है ताकि वे अपनी दृष्टि विकसित कर सकें।

1.2 हिंदी योग्यता संवर्द्धक पाठ्यक्रम (Language-MIL/English Comm. (AECC)

प्रस्तुत प्रश्नपत्र के अंतर्गत हिंदी भाषा और सम्प्रेषण प्रश्नपत्र पढ़ाया जाता है जिसमें वक्ता और श्रोता की बीच किस प्रकार की व्यवहारिक अड़चनें आ सकती हैं का वस्तुपरक अध्ययन छात्र करते हैं यह प्रश्नपत्र **सेमेस्टर -2**

2.1 हिंदी कविता (मध्यकाल और आधुनिक काल) (Core Course-2)

प्रस्तुत प्रश्नपत्र हिंदी को मुख्य विषय के रूप में चुनने वाले छात्रों को भक्तिकालीन, रीतिकालीन और आधुनिक कविता से अवगत कराता है इससे विद्यार्थियों को संतों की वाणी से लेकर मजदूरों के परिश्रमशील सम्पूर्ण तस्वीर छात्रों के सम्मुख प्रस्तुत करता है।

2.2 आधुनिक भारतीय भाषा - हिंदी : भाषा और साहित्य-क/ख/ग Language-MIL/English-1

सेमेस्टर-2 हिंदी भाषा का साहित्य - हिंदी 'क'

(उन विद्यार्थियों के लिए जिन्होंने 12 वीं कक्षा तक हिंदी पढ़ी है)

चूँकि जिन विद्यार्थियों ने 12 वीं तक हिंदी पढ़ी है वे हिंदी साहित्य को आसानी से पढ़ और समझ सकते हैं अतः इस कोर्स में हिंदी भाषा के उदभव, संक्षेप में हिंदी साहित्य का इतिहास एवं भिन्न युगों की कविताएं परिपक्वता लाता है।

सेमेस्टर-3 हिंदी गद्य : उद्भव और विकास - हिंदी 'क'

(उन विद्यार्थियों के लिए जिन्होंने 12 वीं कक्षा तक हिंदी पढ़ी है)

इन छात्रों को हिंदी गद्य के विभिन्न रूपों का सामान्य परिचय दिया जाता है साथ कुछ महत्वपूर्ण कहानियों के साथ निबंध तथा नाटक जैसी विधाएं पढ़ाई भी पढ़ाई जाती हैं, इससे छात्रों में हिंदी गद्य की आधुनिक परिपक्वता लाता है।

सेमेस्टर -2 हिंदी भाषा और साहित्य : हिंदी 'ख'

(उन विद्यार्थियों के लिये जिन्होंने 10 वीं कक्षा तक हिंदी पढ़ी है।)

इस प्रश्नपत्र में हिंदी साहित्य के इतिहास और आधुनिक भारतीय भाषाओं का सामान्य परिचय दिया गया है। भक्तिकाल, रीतिकाल और आधुनिक काल के दो-दो कवि प्रश्नपत्र में लगे हुए हैं यह प्रश्नपत्र छात्रों को

सेमेस्टर-3 हिंदी गद्य का उद्भव और विकास : हिंदी 'ख'

(उन विद्यार्थियों के लिए जिन्होंने 10वीं कक्षा तक हिंदी पढ़ी है)

इस प्रश्नपत्र में कहानियां, निबंध और संस्मरण लगे हुए हैं गद्य विधाओं का भी सामान्य परिचय लगा हुआ है जो छात्रों की जिज्ञासा तथा रचनात्मक क्षमता को बढ़ाने वाला है।

सेमेस्टर-2 हिंदी भाषा और साहित्य -हिंदी 'ग'

(उन विद्यार्थियों के लिए जिन्होंने 8 वीं कक्षा तक हिंदी पढ़ी है।)

इस प्रश्नपत्र में हिंदी का भौगोलिक विस्तार एवं भक्तिकालीन, रीतिकालीन एवं आधुनिक कविताएँ लगी हैं जो हिंदी का सामान्य ज्ञान रखने वाले छात्रों के लिए व्यवहारिक और जानकारी की दृष्टि से उपयोगी है।

सेमेस्टर-3 हिंदी गद्य का उद्भव और विकास -हिंदी 'ग'

(उन विद्यार्थियों के लिए जिन्होंने 8 वीं कक्षा तक हिंदी पढ़ी है)

यह प्रश्नपत्र हिंदी के उद्भव एवं विकास तथा कहानी, निबंध, नाटक, संस्मरण से छात्रों को अवगत कराता है यह साहित्य रुचिकर है पाठ विस्तार सरस है।

सेमेस्टर -3

3.1 हिंदी कथा साहित्य (Core Course-3)

इस प्रश्नपत्र के अंतर्गत उपन्यास और कहानी के स्वरूप और संरचना के बारे में बताया गया है। प्रेमचंद का उपन्यास गबन भी लगा हुआ है कहानियों में परदा, रोज, हरी बिंदी इत्यादि लगी हैं। कोर्स रुचिकर और कठिन नहीं है।

3.2 हिंदी कौशल-संवर्द्धक पाठ्यक्रम (Skill Enhancement Course; Any One)

(क) रचनात्मक लेखन, अथवा (ख) भाषा शिक्षण, अथवा (ग) कार्यालयी हिंदी

(क) रचनात्मक लेखन - इस प्रश्नपत्र का उद्देश्य विद्यार्थियों की रचनात्मक क्षमता को निखारना है यह लेखन की दृष्टि से पत्रकारिता के क्षेत्र में तथा साहित्य के क्षेत्र में विद्यार्थियों को दिशा-निर्देश देता है विद्यार्थियों को परिमार्जित कर सकते हैं।

(ख) भाषा शिक्षण - इस प्रश्नपत्र में भाषा के राष्ट्रीय एवं सामाजिक स्वरूप पर प्रकाश डाला जाता है हिंदी भाषा का मातृभाषा के रूप में एवं द्वितीय भाषा के रूप में तथा विदेशी भाषा के रूप में किस प्रकार शिक्षण करा जाता है।

सेमेस्टर -4

4.1 अन्य गद्य विधाएं (Core Course-4)

इस प्रश्नपत्र के अंतर्गत विद्यार्थियों को गद्य के अन्य कई रूपों से परिचित कराया गया है। संस्मरण, निबंध, एकांकी, व्यंग्य जैसी विधाओं के द्वारा यह प्रयास किया गया है कि विद्यार्थी साहित्य की अन्वेषण कर सकें।

4.2 आधुनिक भारतीय भाषा - हिंदी गद्य : उदभव और विकास-क/ख/ग

(इससे संबंधित सभी प्रकार की जानकारी सेमेस्टर -2 के पाठ्यक्रम के अंतर्गत दी जा चुकी है।)

4.3 हिंदी कौशल संवर्द्धक पाठ्यक्रम (Skill Enhancement Course; Any One)

(क) भाषाई दक्षता, अथवा (ख) विज्ञापन और हिंदी भाषा, अथवा (ग) कम्प्यूटर और हिंदी भाषा

(क) भाषाई दक्षता - इस प्रश्नपत्र के अंतर्गत इस उद्देश्य को महत्व प्रदान किया गया है कि किसी भाषा में दक्षता किस प्रकार प्राप्त की जा सकती है। व्यक्ति के सर्वांगीण विकास के लिए जिस भाषा में वह कार्य करता है उसे कोर्स इस दृष्टि से छात्रों को तैयार करता है।

(ख) विज्ञापन और हिंदी भाषा - यह युग बाजार का युग है जहाँ सारी दुनियां डिजिटल मार्केट से जुड़ गई है। ऐसे में विज्ञापन बाजार में एक महत्वपूर्ण भूमिका निभा रहा है यह कोर्स छात्रों को विज्ञापन की रचनात्मकता को बढ़ावा देता है।

(ग) कम्प्यूटर और हिंदी भाषा - कम्प्यूटर ने जब बाजार में कदम रखा तो कम्प्यूटर की मुख्य भाषा अंग्रेजी बनी हुई थी। हिंदुस्तान में इस बात की आवश्यकता महसूस की गई कि कम्प्यूटर पर हिंदी के प्रयोग से छात्रों को लाभ होगा। कोर्स इस उद्देश्य को महत्व प्रदान करता है कि कम्प्यूटर पर हिंदी प्रयोग की जानकारी हो, यह कोर्स विद्यार्थियों को इससे संबंधित सभी प्रकार की जानकारी प्रदान करता है।

सेमेस्टर -5

5.1 विषय आधारित ऐच्छिक पाठ्यक्रम (Discipline Specific Elective-I)

(क) हिंदी भाषा का व्यावहारिक व्याकरण, अथवा (ख) हिंदी का मौखिक साहित्य और उसकी परंपरा, अथवा

(ग) हिंदी रंगमंच

(क) हिंदी भाषा का व्यवहारिक व्याकरण - इस प्रश्नपत्र में हिंदी भाषा का व्याकरणिक अध्ययन किया जाता है। वाक्यों और शब्दों की अशुद्धियों से परिचित कराया जाता है। यह प्रश्नपत्र छात्रों को भाषिक तौर पर

(ख) हिंदी का मौखिक साहित्य और उसकी परंपरा - इस प्रश्नपत्र के तहत विद्यार्थियों को मौखिक साहित्य की परंपरा से परिचित कराया जाता है। जिसमें लोकगीत, लोककथाएं, लोकनाटक, लोकोक्तियां जैसे लोक परंपरा समझाने में सहायक है।

(ग) हिंदी रंगमंच - इस विषय के अंतर्गत पारंपरिक रंगमंच की विभिन्न शैलियों से परिचित कराया जाता है और भारत के प्रमुख रंगकर्मियों और उनकी रंगदृष्टि भी विषय अध्ययन के अंतर्गत है। यह प्रश्नपत्र भारत

5.2 सामान्य (जेनरिक) ऐच्छिक पाठ्यक्रम (Generic Elective - Any One)

(क) अनुवाद : व्यवहार और सिद्धान्त, अथवा (ख) जनपदीय साहित्य

(क) अनुवाद - व्यवहार और सिद्धान्त - इसमें अनुवाद के सिद्धान्तों के सन्दर्भ में समझाया जाता है। अंग्रेजी से हिंदी अनुवाद और हिंदी से अंग्रेजी अनुवाद के व्यवहार से अवगत कराया जाता है। आज के तकनीकी अवगत हों जो उनके कैरियर के लिए भी महत्वपूर्ण हैं।

(ख) जनपदीय साहित्य - इस जनपदीय साहित्य के अंतर्गत विभिन्न जनपदों के लोकगीत, लोककथाएं, लोकनाटक एवं पहेलियां इत्यादि पढ़ाई जाती हैं। सोहर, विवाह, मंगलगीत, बारहमासा, होली, कजली गीत ए

सेमेस्टर -6

6.1 विषय आधारित ऐच्छिक पाठ्यक्रम (Discipline Specific Elective-2)

(क) साहित्य चिंतन, अथवा (ख) कोश विज्ञान: शब्दकोश और विश्वकोश, अथवा (ग) विशेष अध्ययन: एक प्रमुख साहित्यकार

(क) साहित्य चिंतन - इस प्रश्नपत्र के तहत साहित्य का स्वरूप, साहित्य और समाज और साहित्य की प्रयोजनीयता पर विचार किया जाता है इसके साथ ही साहित्य के व्याकरणिक अवयव भी पाठ्यक्रम में समाहित बताने में सक्षम है।

(ख) कोश विज्ञान - शब्दकोश और विश्वकोश-इस पाठ्यक्रम के अंतर्गत शब्दकोश और विश्वकोश के उपयोग की जानकारी दी गयी है। कोश की निर्माण प्रक्रिया और कोशों के प्रकार के बारे में बताया गया है ऐसे उ

(ग) विशेष अध्ययन - एक प्रमुख साहित्यकार-इस प्रश्नपत्र में छात्रों को कबीर, तुलसी, प्रेमचंद और निराला में से किसी एक साहित्यकार पर विधिवत अध्ययन कराया जाता है। जिससे साहित्यकार से सम्बंधित सम मजबूत बनता है।

6.2 सामान्य (जेनरिक) ऐच्छिक पाठ्यक्रम (Generic Elective - Any One)

(क) अस्मितामूलक अध्ययन और हिंदी साहित्य, अथवा, (ख) हिंदी सिनेमा और उसका अध्ययन

(क) अस्मितामूलक अध्ययन और हिंदी साहित्य - इस कोर्स के अंतर्गत दलित विमर्श, स्त्री विमर्श और आदिवासी विमर्श को अध्ययन के लिए चुना गया है। ये सारे विमर्श हिंदी साहित्य के अंतर्गत नयी अवधारणा प्रासंगिक भी हैं अतः इनका अध्ययन आवश्यक है।

(ख) हिंदी सिनेमा और उसका अध्ययन - इस कोर्स का उद्देश्य छात्रों को सिनेमा के क्षेत्र से अवगत कराना है। सिनेमा के क्षेत्र में कैमरा क्या भूमिका निभाता है इस पर प्रकाश डाला गया है। कुछ चुनिंदा फिल्मों के छात्रों को रोजगार प्रदान कर रहा है अतः इसका अध्ययन आवश्यक है।

10. B.A. (Honours) in History

SEMESTER - I

CC I: History of India I - The paper enables students in understanding early Indian notions of history and consciousness of the past, sources and tools of historical reconstruction to gender, environment, technology and regions).

SEC VI : Popular Culture - This course aims to provide students with a critical understanding of popular culture. One of the objectives of the course is to help the student attempt a complex theoretical discussion on the subject.

12. B.A. (Prog.) with Food Technology

CORE COURSES

SEMESTER I: DSC-FT-1A: FUNDAMENTALS OF FOOD SCIENCE AND TECHNOLOGY - PART I (Theory+ Practical)

Objectives

1. To introduce students to the field of food science and technology.

2. To familiarize them with the science and processing of cereals, pulses, fruits and vegetables.

SEMESTER II: DSC-FT-1B: FUNDAMENTALS OF FOOD SCIENCE AND TECHNOLOGY – PART II

(Theory + Practical)

Objective:

1. To familiarize students with the composition and processing of milk, egg, meat, sugars, fat and beverages.
2. To introduce them to the concept of food hygiene and adulteration

SEMESTER III: DSC-FT-1C: INTRODUCTION To BAKING TECHNOLOGY (Theory + Practical)

Objectives:

1. To impart students with basic knowledge relating to the principles of baking
2. To introduce them to the techniques of cake and pastry processing.

SEMESTER IV: DSC-FT-1D: INTRODUCTION TO FOOD SAFETY AND PRESERVATION TECHNOLOGY (Theory + Practical)

Objectives:

1. To impart students with basic knowledge relating to food safety and principles of preservation.
2. To introduce them to the concept of processing and preservation of fruits and vegetables.

DISCIPLINE SPECIFIC ELECTIVES

SEMESTER V: DSE- FT-1Aa: ADVANCED BAKING TECHNOLOGY (Theory + Practical)

Objectives:

1. To equip students with knowledge related to baking technology.
2. To impart knowledge related to processing techniques of bread, biscuits and cookies.
3. To familiarize them with various food packaging materials

SEMESTER VI: DSE -FT-1Ab: ADVANCED FRUIT AND VEGETABLE PRESERVATION TECHNOLOGY (Theory + Practical)

Objective:

1. To equip students with advanced knowledge of processing and preservation technology of fruits and vegetables.

SKILL ENHANCEMENT COURSES

SEC 1: FOOD PRODUCT DEVELOPMENT* (PRACTICAL)

Objectives To understand the concept of development of a new product and prepare new products based on special dietary requirements, functionality, convenience and imp

SEC 3: CONFECTIONARY TECHNOLOGY (PRACTICAL)

Objectives

1. Understanding status of confectionary industry in India
2. To learn the technologies of confectionary products.
3. To know about innovations in this sector.

SEC 4: NUTRITION AND WELLBEING (PRACTICAL)

Objectives

1. To enable the students to identify food sources of nutrients and record diet of self
2. To introduce them to meal planning and concept of food exchange list
3. To familiarize them with planning of diets and and preparation of nutritious snacks for various income groups
4. To make them learn about nutritional labeling and BMI estimation

SEC-6: HOME BASED CATERING (THEORY)

Objectives

1. To introduce students to the concepts of food service and food production,
2. To acquaint them with different resources required for setting a homebased catering
3. To familiarize them with planning of a food service unit

GENERIC ELECTIVES

GE-FT-1: BAKING TECHNOLOGY (THEORY + PRACTICAL)

Objectives:

1. To impart students with knowledge related to baking technology.
2. To introduce them to the techniques of cakes, biscuits and pastry processing.

GE-FT-2: FRUIT AND VEGETABLE PRESERVATION TECHNOLOGY (THEORY + PRACTICAL)

Objectives:

1. To impart students with basic knowledge related to fruit and vegetable preservation.
2. To impart knowledge of preservation of fruits and vegetables.

MECHANISM OF COMMUNICATION

Lectures, Discussions, Assignments, Quiz, Power Point presentations, Websites, Practicals, Demonstration, Field visits, E-learning material, MOOCs.

13. B.A. (Prog.) with Apparel Design and Construction (ADC)

As much as apparel is a basic necessity, the apparel sector is a vital constituent of the economy and a significant provider of employment and self – employment opportunities. Construction not only aims at preparing the students for a wide variety of jobs in the apparel industry but also focuses on enabling the students to develop and apply their creative textiles. The theoretical and practical knowledge imparted through this course provide a strong foundation for students' further studies and professional careers.

- An appreciation is developed for well designed and constructed garments and an awareness of the components of quality and performance of apparel.
- An understanding of the principles, processes, and techniques which are fundamental to efficient and effective clothing construction is inculcated.
- After this course student become awareness about the parameters and specifications useful in selecting the material required for apparel construction and their sources.
- A proficiency in the design and construction of apparel is achieved. Also an understanding for consumer preference and the requirements of markets for apparel is achieved.
- An appreciation for creativity and innovation in fashion design is inculcated as a habit and awareness about designing methods is created.
- Awareness about efficient management of resources required to commercially producing and marketing apparel and making informed consumer choices in entrepreneurship.
- Create understanding of the apparel industry and trade as well the latest trends in garment construction technologies and quality requirements.
- An appreciation for traditional Indian textile art forms is inculcated through education for sustainability of art and tradition.
- Prepare students for professional careers in the garment industry viz. Fashion designer, Fashion blogger, Sketching artist, Apparel merchandiser, Entrepreneur, Textile art etc.

Course wise Specific Outcome for B.A.(Prog) Apparel Design & Construction

- Discipline Specific Course (DSC) 1-4
- Discipline Specific Elective (DSE) 5-6
- Skill Enhancement Course (SEC) 1-5
- Generic Elective (GE) 1-4

Discipline Specific Course (DSC) Semester 1

Fundamental Textile Science and Apparel Construction I

Idea of accepting an art is to acclimatize with its terminology, we start with inculcating Fashion and Fabric terminology into the students. Subject specific understanding is dev fabric goods. Awareness is created in terms of use and selection of Apparel as well as home textiles items. Students become well worse after market surveys and practically hand industry.

- To familiarize the students with the terminologies related to apparel and its construction.
- To impart knowledge about textile fibres in terms of their origin and performance characteristics.
- To create awareness regarding selection criteria relating to apparel and home textiles.
- To acquaint the students with the tools and equipment used for sewing.
- To impart practical knowledge through market survey and fabric handling.

Discipline Specific Course (DSC) Semester 2

Fundamental Textile Science and Apparel Construction II

After learning about smallest unit of fabric, gradually next step of yarn processing followed by fabric construction technique is taught. For better understanding expert craftsm Consumer is concerned with performance of textile, which is by and large affected by finishes imparted; these are taught in detail. Students learn the art of transforming flat fab hands on practical knowledge.

- To impart knowledge about yarn production and properties.
- To foster an understanding of the various fabric construction techniques.
- To develop an understanding of the various finishes used in the apparel industry.
- To acquaint the students with the importance of taking correct body measurements and size charts.
- To introduce the concept of drafting and paper pattern.
- To impart practical knowledge about apparel and home textile production.

Discipline Specific Course (DSC) Semester 3

Textile Design Techniques

- A comprehensive knowledge about the concepts of dyeing, style and methods of printing of textiles is infused to make them ready for industry.
- A technical understanding of traditional Indian embroideries-motifs used, colour combinations used etc. is inculcated among the students.
- Develops an understanding of Indian culture through the crafts among students, so that the variety in skills and expressions of the Indian artist is appreciated by students.
- Create awareness among the students about the relationship of tradition and contemporary trends.

Discipline Specific Course (DSC) Semester 4

Fashion Studies and Design Development

A practical understanding of elements and principles of design which are fundamental to create various designs, is implanted in form of portfolio.

- To familiarize the students to initial concept to development of design through design brief, design inspiration, rendering of designs and about different fashion details wh
- An awareness about fashion terminology, basic factors affecting fashion as well as understanding about National and International fashion designers and their work is crea
- Prepare students for professional careers in the various fields like Fashion designer, Fashion blogger, Sketching artist etc.

Discipline Specific Elective (DSE) Semester 5

Apparel industry and quality assessment

This paper train students for assessment of apparel quality at various stages, as quality management is imperative for apparel industry in today's global age. Nothing could be m apparel quality. An educated customer will be a wiser decision maker; hence we prepare students with customer rights and responsibilities.

- A comprehensive knowledge about judging the quality of readymade garments, at various stages of pre and post garment production is provided to the students.
- Students are acquainted with the readymade garment industry. They are also informed about the challenges as well as prospects of the industry.
- Concept of marketing and its 4 Ps are well explained to the students.
- Understanding of target group is developed by working on various promotional campaigns like advertising brochures, etc.
- The multifaceted role of merchandiser, in the apparel industry is well understood with help of principles and techniques.
- An awareness is generated for domestic and export garment sector. Also recent development, challenge and prospect are explained.

Discipline Specific Elective (DSE) Semester 6

Apparel construction

It is imperative for an apparel industry practitioner to have an understanding of various fabrics; this is provided along with nuances of fitting apparel. With the all-time high use successful business, so is for apparel industry. This is well taken into account for by covering Computer Aided Designing (CAD) and Computer Aided Manufacturing (CAM).

- To familiarize the students with the concept of handling of different fabrics.
- To impart practical understanding with regard to various fabric handling, fabric survey and construction are carried.
- To understand the common fitting problems and their corrections.
- To understand the role of CAD & CAM for garment designing and construction in the apparel industry.
- To equip the students with the knowledge about the problems faced by a textile consumer and his rights.

Skill Enhancement Course 1

Fashion Event Management

1. Development of practical understanding about different events such as wedding, sports, corporate, rallies and different fashion events etc., their planning and efficient ma events.
2. Helps to bring out the creative talents of the students in a good way
3. It will create the awareness about the whole steps involves in conducting an event right from the planning, financing, conceptualizing etc.
4. It also helps in practical understanding about the main administrative, design, marketing, operational and risk management steps required for the successful organization
5. Prepare students for professional careers in the garment industry viz. Fashion Event manager, event coordinator etc.

Skill Enhancement Course 2

Effective Dressing Skills

1. Development of skills of dressing and selecting styles effectively for different body types.
2. An understanding of elements and principles of design is inculcated which helps the students to create the right impression with clothes and accessories.

3. Develops the practical basic knowledge and skills required for making minor alterations in readymade garment to get the correct look and fit.
4. After this course, students would have awareness to recognize and evaluate quality workmanship and making wise buying decisions.

Skill Enhancement Course 3

Apparel retail

Marketing and retailing are most important aspects of apparel industry which are well understood by the students, in practical manner with the help of designing individual pr attractive placements.

- Awareness and understanding of the evolution and current structure of the apparel retailing industry in India is generated.
- An understanding and appreciation of the 4 Ps of marketing is developed.
- Basic principles of visual merchandising and effective customer handling practices are effectively taught to the students.
- Various retail formats are well explained to the students, this opens wider career prospects.

Skill Enhancement Course 4

Apparel Etail

Electronic marketing is the highest potential form for various marketing practices. Students are prepared for electronic business in form of apparel etail which is growing enorm effective website is provided to the recipients.

- An overview is provided about strengths and weaknesses of both retail and etail, to help understand in an efficient way.
- In depth insight is provided in to the evolving business of apparel etailing.
- Awareness is generated for the broad categories of etail business models along with the important factors governing the design of online apparel stores.
- Understanding is provided of the relative strengths and weaknesses of apparel retail and etail operations and an appreciation of the role of multichannel retailing.

Skill Enhancement Course 5

Design Development Project

1. A practical understanding about design development in form of portfolio is inculcated.
2. Helps to understand initial concept to development of design through design brief, design inspiration, sourcing of material etc.
3. Prepare students for professional careers in the garment production industry viz. merchandiser, production coordinator, sampling in charge, technical designer etc.

Generic Elective 1

Fashion: Design and Development

1. Creates an understanding of Indian costume of the Vedic and Mughal period as well as different fashion design details which are incorporated in a fashion garment.
2. A practical understanding about different fashion details which are important for effective clothing construction is developed.
3. This course helps students to make their career in fashion designing by inculcating the practical knowledge about fashion forecasting, process and fundamental principles

Generic Elective 2

Fashion Accessories

1. An understanding about head-to-toe preparation in the industry is infused and helps student develop a broad set of skills in the key areas of vision, craft and business.
2. From the initial concept and design to the full range of fabrication techniques, supply-chain management and distribution understanding is developed.
3. Student learns to forecast trends, market their designs and manage a fashion brand.
4. An appreciation for creativity and innovation in product design is inculcated as a habit and awareness about designing methods is created.

Generic Elective 2

Textiles: Care and Conservation

Textile conservation has attained new height of success in recent times, opening multiple doors as work opportunities for youth. Textiles is one of the most important indicators of its importance. We train students for textile conservation at different stages. Knowledge on effective display of the textile items is provided to make them ready for industry.

- Students are trained for multifaceted career like exhibition organiser, art curator, display manager, textile restoration officer to name a few.
- Awareness about cleaning equipment opens door for a profession in refurbishing services to our alumni. These refurbishing services are very much demanded by profession.
- Understanding of Principles of textile cleanliness is developed, by explaining role of water and cleaning additives.
- Awareness is developed with regard to instruments available for cleaning, drying, finishing and ironing textiles. This information helps students to select best suited practices.
- Conservation of textiles in museums requires comprehensive knowledge in the field, which is well imparted in the students. Along with ethics and current practices follow.

Generic Elective 4

Appreciation of Textile Crafts

1. Creates an understanding about the critical role of craft communities and its integral relationship to the Indian society.
2. It helps to understand Indian culture through the crafts, so that students appreciate the variety of skills and expressions of the Indian artist.
3. An understanding of the relationship between tradition and contemporary trends, form and function, creator and consumer is inculcated.
4. Develops an understanding of the processes of creating a craft object from start to finish.
5. Values of conservation, protection of the environment, resources and heritage of the country is developed.

14. B.Sc. (Hons.) Mathematics

SEMESTER-1

Core Paper C1: Calculus

Calculus is the branch of mathematics that studies how things change and what are the effects of change on systems. The course curriculum covers the important topics necessary for finding the maxima and minima.

Vector functions and their properties are also taught in this course. The students also get knowledge about the planetary motion. Some sketching techniques of curves and their practical application of calculus is in every field of life like the maxima and minima property is used to find the contents of drugs in blood streams.

Core Paper C2 : Algebra

The course covers polar representation of complex numbers, matrix theory and linear algebra, emphasizing topics useful in other disciplines. Complex numbers are used in electrical engineering and transformations are used in understanding oscillations that occur both in alternating current and in signals modulated by electromagnetic waves. Linear algebra is a branch of mathematics and the properties of matrices. The concepts of linear algebra are extremely useful in Physics, Economics, Social Sciences and natural sciences and engineering. Due to its broad applications, it is one of the most widely taught subjects in college level mathematics.

Generic-I (GE-I) : Calculus

Calculus is a part of modern mathematics education. A course in calculus is gateway to other, more advanced courses in mathematics devoted to the study of functions and limits. It has two main branches namely Differential Calculus and Integral Calculus. These two branches are related to each other by the Fundamental Theorem of Calculus. Applications include velocity and acceleration, the slope of a curve and optimization. Application of integral calculus includes computation involving area, volume, arc length, center of mass, etc. This GE course is designed to develop the topics of differential and integral calculus with emphasis placed on limits, continuity, derivatives, and integrals of algebraic and transcendental functions.

SEMESTER-2

Core Paper C3 : Real Analysis

The course deals with behavior of real numbers. It includes the topics on bounded sets, completeness property of real numbers, limit points, sequences and series of real numbers as well as applied mathematics. On completion of the course the students will be able to deal with various subsets of set of real numbers and their properties and will be prepared for further studies.

Core Paper C4 : Differential Equations

This course identifies order and degree of differential equations and develops essential methods of solving these equations. It also provides applications of ordinary differential equations. After the course students are able to solve homogeneous and non-homogeneous differential equations of second and higher order. Students also show an awareness of initial and boundary conditions and the general solution of second order differential equation. Students also learn to visualize and manipulate ODE's in graphical, numerical and symbolic form.

Generic Elective-2(GE-2) : Linear Algebra

Linear algebra is a branch of mathematics that studies systems of linear equations and the properties of matrices. The concept of linear algebra is extremely useful in Physics, Electrical and Mechanical engineering. Due to its broad range of applications, linear algebra is one of the most widely taught subjects in college level mathematics.

SEMESTER-3

Core Paper C5 : Theory of Real Functions

In this paper Limit and continuity of a real valued function at a point and on intervals defined and given their sequential criterions. Further one sided limits, infinite limits and limits at infinity, continuous functions, Uniform continuity and differentiability of functions at a point and on interval, also defined and talks about their algebra. And given important results for maxima and relative extrema.

Core Paper C6 : Group Theory-I

This course includes the basics of groups, such as properties of groups, subgroups, cyclic groups, permutation groups. It also includes some important theorems like Lagrange's theorem, Cayley's theorem, First, Second and Third isomorphism theorem.

The group theory has many applications in physics, chemistry and materials science. Also algebraic and cryptography uses group theory in many ways.

Core Paper C7 : Multivariable Calculus

Multivariable Calculus is the extension of Calculus in one variable with function of several variables, limit and continuity of function of two variables, the differentiation and integration of functions of multiple variables rather than just one. Students also learn how to evaluate directional derivatives, gradient and extrema of functions of two variables with constrained optimization. Double integrals over a rectangular and non-rectangular region and using polar co-ordinates and evaluating triple integrals over a parallelepiped and solid regions.

Generic-I(GE-3) : Differential Equations

The course of differential equations for students of other Honours courses is being structured so as to give them the basic knowledge of ordinary differential equations and partial differential equations. The methods to solve these equations are taught in this course like finding the wronskian, the method of variation of parameters, etc. to solve the ordinary differential equations. In partial differential equations, the formation of first order partial differential equation, Lagrange's and Charpits method to solve them and how to classify the second order differential equation into elliptic, parabolic and hyperbolic. The main objective of this course is to provide them with the basic knowledge as they are used in wide variety of disciplines like biology to find the concentration of drug in the blood, chemistry, economics, etc. The partial differential equations have applications in fluid mechanics, heat and mass transfer etc.

SEC-I : Latex n HTML

This syllabus explains the use of popular mathematical tools for scientific writing using LaTeX. For beginner it is very good to learn Mathematical typesetting in Latex. It includes graphics in LaTeX; PSTricks; Beamer presentation; HTML, creating simple web pages, images and links, design of web pages.

SEMESTER-4

Core Paper C8 : Partial Differential Equations

This course includes the introduction of partial differential equations (PDE) of first and second order. Also provides the handful of methods to solve first order PDE which further three important classes of second order PDE (wave equation, heat equation and Laplace equation) appropriate for modeling different sorts of phenomena are introduced and they are considered. The technique of separation of variables will be used to reduce the problem to that of solving the sort of ordinary differential equations and writing the general

Core Paper C9 : Riemann Integration & series of functions

The basic idea of Riemann integral is to use simple approximation for calculating area. In this paper the students are taught about lower sums and upper sums, piecewise continuous and some properties of Riemann integral. Results related to sequence and series of functions are also discussed in this paper. The difference between point wise and uniform convergence

Core Paper C10 : Ring Theory and Linear Algebra-I

This course includes the basis of rings such as, properties of rings, ideals, prime and maximal ideals of rings. It also provides the study of vector spaces, linear span, basis, linear transformations. Ring theory is one of the branches of abstract algebra. It has many applications in various branches of mathematics like coding theory, topology, cryptography etc.

Vector spaces also play a prominent role in mathematics. Linear operators defined on an infinite dimensional complex vector spaces are frequently used to study the essence of

Generic Elective-4 (GE-4) : Numerical Analysis

This syllabus is divided into three parts. Definitions of different types of error are there. Numerical method to solve nonlinear equations, system of linear equations, first order ordinary differential equations and numerical integration are discussed.

SEC : CAS & Related Softwares

This syllabus includes use of Mathematica, Maple, and Maxima as calculator, in computing functions, in making graphs; MATLAB/Octave for exploring linear algebra and to plot 3D surfaces, calculator, explore data and relations, testing hypotheses, generate table values and simulate data, plotting.

SEMESTER-5

Core Paper C11 : Metric Spaces

The course lays foundation of one of the basic disciplines namely Topological Spaces of Pure Mathematics. The concept of distance between two points of a set is introduced by metric on real line. The course includes various topics such as open and closed balls, neighborhood, open sets, continuous mappings, sequences, connectedness and compactness. The

Core Paper C12 : Group Theory-II

Abstract algebra evolved in the twentieth century out of nineteenth century discoveries in algebra, number theory and geometry. It is a highly developed example of the power of abstraction. Group is an important example of an abstract, algebraic structure and groups permeate much of mathematics particularly wherever there is an aspect of symmetry involved. After Group Theory-I course, this course commences with concept of an automorphism for finite and infinite cyclic groups, group automorphisms and applications of factor group, characteristic subgroups, commutator subgroups and its properties are discussed. Furthermore, properties of external direct products of groups, the group of units modulo n and direct products, Fundamental Theorem of finite abelian groups are also taught. The most pivotal topic of this course is group action which is studied in much detail with ample examples. Group actions such as Generalized Cayley's theorem, Index theorem. The course concludes with Sylow's theorems and its consequences to Simple groups and non-simplicity tests. The emphasis on understanding and writing proofs of various theorems. Suitable illustrations and counter examples contribute towards a better understanding of the theoretical concepts and the knowledge that intends to prepare the student well for an advanced level course on abstract algebra as well as further research in this topic.

DSE-I (i) : Numerical Methods

This course is divided into three sections.

First section includes the Algorithms, Convergence, Bisection method, False position method, Fixed point iteration method, Newton's method, Secant method, LU decomposition methods which are used in determining the roots of an equation of the form

$$f(x) = 0$$

Second section includes the Lagrange and Newton interpolation: linear and higher order, finite difference operators which are used to construct the interpolating polynomials for a given function

$$f(x)$$

Third section includes Numerical differentiation: forward difference, backward difference and central difference. Integration: trapezoidal rule, Simpson's rule, Euler's method and Runge-Kutta method for a given function

and for the evaluation of the integral

$$\int_a^b f(x) dx$$

where a, b may be finite or infinite.

This course enables the students to apply numerical methods in solving the problems by finding an approximated solution with desired accuracy, where analytical solutions are not possible. The subject course consists of practicals so that student learn to design a suitable algorithms and write a program in MATHEMATICA/ MATLAB for each of the mentioned method in the laboratory to solve problems.

DSE-I (ii) : Mathematical Modelling And Graph Theory

This syllabus is divided into three parts. In first part the solution of a differential equation is given by series solution and Laplace Transform method. In second part mathematical problems are solved. In third part basic definitions related to Graph Theory are given. Also applications to dominoes, diagram tracing puzzles, Knight's tour problem, gray codes are discussed.

DSE-II (i) : Discrete Mathematics

This course comprises of two sections namely Lattice Theory and Graph Theory. The section on lattice theory discusses the results and examples based on concepts such as ordered lattices as ordered sets and algebraic structures, sublattices, cartesian products and homomorphisms of lattices. The notions of modular and distributive lattices are studied via Boolean algebras and Boolean polynomials is undertaken, and concludes with numerical methods of computing minimal forms of Boolean polynomials such as Quinn-McCluskey method. Various notions associated with graphs such as pseudographs, complete graphs, bipartite graphs, isomorphism of graphs, paths and circuits, Eulerian circuits, and Hamiltonian theory such as the travelling salesman problem, shortest path problem, Dijkstra's algorithm, Floyd-Warshall algorithm are also discussed. This course has proved to be quite popular and relatively light and scoring compared to the theory based papers taught in this semester.

DSE-II (ii) : Cryptography

This course will provide students with a theoretical knowledge of cryptography and network security. By the end of the course, students should be able to:

- Understand the fundamental principles of access control models and techniques, authentication and secure system design.
- Have a strong understanding of different cryptographic protocols and techniques and be able to use them.
- Apply methods for authentication, access control, intrusion detection and prevention.
- Identify and mitigate software security vulnerabilities in existing systems.

This course includes Definition of a cryptosystem, Symmetric cipher model, Classical encryption techniques, Polynomial and modular arithmetic, Introduction to finite field arithmetic, Euler's theorem(statement only), Chinese Remainder theorem, Discrete logarithm. Advanced Encryption Standard (AES), Stream ciphers. Introduction to public key cryptography to elliptic curve cryptography. Information/Computer Security, Cryptographic Hash functions, Secure Hash algorithm, Digital signature, E-mail security: Pretty Good Privacy (PGP)

SEMESTER-6

Core Paper C13 : Complex Analysis

In the syllabus of this paper there is little generalization of Real Numbers to Complex. Defined differentiability in complex, and given necessary condition to be differentiable in condition for differentiable functions, also define analytic functions in complex. Given definition of contours and defined integration of a complex valued function over contour theorem, Cauchy- Goursat theorem, Cauchy integral formula, Liouville's theorem and fundamental theorem of algebra, also have result (i.e. Taylor's theorem) in which an analytic and an analytic function on an annulus region has Laurent series. And in the last studied different types of isolated singularities.

This paper also includes practical's in which we learned how to plot algebra of complex numbers, conjugate, modulus, and phase angle. And also calculate integration over straight line. Software like MATLAB/ MATHEMATICA/MAPPLE etc. Also plot complex valued functions and their Taylor series and Laurent series. And also find pole and residue.

Core Paper C14 : Ring Theory and Linear Algebra-II

This course is an extension of Ring Theory and Linear Algebra-I studied in the earlier semester. In this semester, the study progresses on to the concept of polynomial rings over commutative rings, consequences, principal ideal domains, factorization of polynomials and their reducibility and irreducibility tests. The notions of irreducible elements, prime elements, unique factorization are studied in detail. The primary section of the course is linear algebra which commences with dual spaces of a vector space, dual basis, double dual, transpose of a linear transformation and Eigen vectors for a linear operator and also, for square matrix are studied via suitable examples and geometrical interpretations. Several results providing necessary and sufficient conditions are proved. The study of invariant subspaces is undertaken which leads to proof of an interesting theorem - Cayley-Hamilton theorem. Further, the notion of minimal polynomial is studied via results and examples. The highlight of the course is the study of inner product spaces and related concepts such as norms, orthogonalization process, orthogonal complements. The application of the theoretical results to real life problems are discussed via the methods of least squares approximation and minimal solutions to systems of linear equations. This is based on normal and self-adjoint operators. This course has proved to be extremely beneficial for students appearing for competitive exams and also, paves way for an advanced graduate level.

DSE-III (i) : Probability Theory & Statistics

Probability theory is a branch of mathematics that deals with modeling uncertainty. It is important because of its direct applications in areas such as genetics, finance and telecommunications. It has many other areas in the mathematical sciences including statistics, modern optimization methods and risk modeling. The course provides an introduction to the probability theory, sample space, probability axioms, real random variables (discrete and continuous), cumulative distribution function, probability mass/density functions, mathematical expectation, characteristic functions, discrete distributions, continuous distributions. Joint and conditional distributions, expectation of function of two random variables, conditional expectation, normal distribution, correlation coefficient, joint moment generating function, linear regression for two variables. Chebyshev's inequality, Limit theorems, Markov Chains. This course introduces the students the fundamentals of statistical analysis and hence, enables them to pursue advanced level courses in Statistics at the post-graduation stage.

DSE-III (ii) : Bio-Mathematics

This course aims

- To introduce students to the application of mathematical modeling in the analysis of biological systems including populations of molecules, cells and organisms.
- To show how mathematics, statistics and computing can be used in an integrated way to analyse biological systems.
- To develop students' skills in algebraic manipulation, the calculus of linear and non-linear differential equations, mathematical modelling, matrix algebra and statistical methods.
- To introduce students to the use of R for the analysis of biological processes and data, including simple computer programming.

At the end of the course, students should:

- have an enhanced knowledge and understanding of mathematical modeling and statistical methods in the analysis of biological systems;
- be better able to assess biological inferences that rest on mathematical and statistical arguments;
- be able to analyse data from experiments and draw sound conclusions about the underlying processes using their understanding of mathematics and statistics;

- be aware of the use of computers to assist them in studying mathematical functions and carrying out statistical tests.

DSE-IV (i) : Number Theory

Number theory is a branch of pure mathematics devoted to the study of the natural numbers and the integers. It is the study of the set of positive whole numbers which are usually given a foundational place in the discipline, Number theory is also called "The Queen of Mathematics". The number theory helps discover interesting relationships between different sets of numbers.

This course provides an introduction to the study of set of integers and their algebraic properties. Topics include prime factorization and divisibility, linear Diophantine Equations, Chinese remainder theorem, Fermat's little theorem, Wilson's Theorem, number theoretic functions, sum and product of divisors, totally multiplicative functions, Dirichlet characters, residues, Euler phi-function, order of an integer modulo n , primitive roots of primes, composite numbers of primitive roots, Euler's Criterion, Legendre Symbol and its properties. Some of the theoretical results in the form of Public Key and RSA encryption and decryption are also studied.

DSE-IV (ii) : Linear Programming & Theory of Games

The course begins with the introduction to the linear programming problem. Then it focuses on the simplex method. Next section, deals with the transportation problem and its methods to solve a transportation problem. Also, the students study assignment problem and its mathematical formulation. In the end, the course deals with the Game Theory and the methods for solving two person zero sum games.

The Simplex algorithm is the basis for mathematical optimization and provides the practical method to solve a linear programming problem. Business managers can use optimization to improve their performance. It has powerful capabilities that enable businesses to reduce costs, improve profitability, use resources effectively, reduce risks and provide better services.

15. B.A. (Prog.) with Mathematics

SEMESTER-1

Discipline Paper : Calculus

This course structure gives basic idea of functions, limits and continuity, differentiation, successive differentiation, integration, partial derivatives, locating maxima and minima.

SEMESTER-2

Discipline Paper : Algebra

The course includes many topics of algebra. Basic introduction of vectors, their properties are discussed in this paper. Then their linear dependence and independence also discussed. Linear homogenous and Cayley Hamilton Theorem are discussed. The course curriculum also covers the topics on De Moivre's theorem, finding the roots of n -degree equations, and binomial expansion.

SEMESTER-3

Discipline Paper : Analytic Geometry n Applied Algebra

The course includes the study of conic sections, spheres, cylindrical surfaces, vectors and their properties, applications of algebra that include Latin squares and street surveillance. Students will be able to sketch graphs of different conic sections, and perform addition and subtraction of vectors, scalar multiplication and vector multiplication. All these concepts are important for further studies.

SEC-I : Latex n HTML

This syllabus explains the use of popular mathematical tools for scientific writing using LaTeX. For beginner it is very good to learn Mathematical typesetting in Latex. It includes graphics in LaTeX; PSTricks; Beamer presentation.

SEMESTER-4

Discipline Paper : Analysis

This course provides the study of real numbers and their properties, bounded sets, limit points, convergence of sequences and series. All these concepts are important for further studies. In this course the students will be able to understand behavior of real numbers and their applications.

SEC-II : Computer Algebra System (CAS)

This syllabus includes use of Mathematica, Maple, and Maxima as calculator, in computing functions, in making graphs; MATLAB/Octave for exploring linear algebra and to plot calculator, explore data and relations, testing hypotheses, generate table values and simulate data, plotting.

SEMESTER-5

Discipline Paper : Differential Equations

The course of differential equations for B.A. Prog students is being structured so as to give them the basic knowledge of ordinary differential equations and partial differential equations are taught in this course like finding the wronskian, the method of variation of parameters, etc. to solve the ordinary differential equations. In partial differential equation formation of first order partial differential equation, Lagrange's and Charpits method to solve them and how to classify the second order differential equation into elliptic, parabolic and hyperbolic. The course is to provide them with the basic knowledge as they are used in wide variety of disciplines like biology to find the concentration of drug in the blood, chemistry, economics etc. The partial differential equations have applications in fluid mechanics, heat and mass transfer etc.

SEC-III : Statistical Software R

In this course, you will learn how to use R for effective data analysis. The course will begin with an introduction to programming languages and programming in R. You will learn a wide range of vocabulary to aid in data analysis. This course includes practicals using R programming language whose benefits include:

- R's free and open-source: There is no need to keep track of expensive licenses, it's available to all (e.g. Mac, Windows, Linux), and the source code is explorable and editable.
- R's great for statistics: R's foundation is one of statistical analysis. Designed by statisticians, the resulting language is intuitive for statistical analysis and the flexible statistical software.

At the end of this course, students will be able to:

- List motivation for learning a programming language
- Access online resources for R and import new function packages into the R workspace
- Import, review, manipulate and summarize data-sets in R
- Explore data-sets to create testable hypotheses and identify appropriate statistical tests
- Perform appropriate statistical tests using R

Generic-I : General Mathematics-I

This paper divided into 3 sections in the 1st section there is brief introduction about lives and information on the work of different renowned mathematicians.

In the 2nd section there is overview and history of number systems and its theory and defined algebraic number, transcendental number, prime numbers, Fermat numbers etc.

3rd section contains matrices, different types of matrices, determination of matrix and inverse of matrix by different method.

SEMESTER-6

Discipline Paper : Statistics

This course equip students to learn concepts and tools for working with data and have experience in analyzing real data that goes beyond the content of a service course in statistics. It includes understanding of the fundamentals of probability theory, statistical reasoning and inferential methods, statistical computing, statistical modeling and its limitations, and have analysis of data by graphical and other means. Also graduates are expected to learn to communicate effectively.

SEC-IV : Transportation and Network Flows

This course includes Transportation problem and its mathematical formulation, northwest-corner method least cost method and Vogel approximation method for determinat transportation problem, assignment problem and its mathematical formulation, Hungarian method for solving assignment problem. Game theory: formulation of two person games with mixed strategies, graphical solution procedure. This course enables the students to identify the special features of the transportation and network flow problem. It specialized linear programming concepts (integer LP, transportation and assignment models, network models) and unconstrained and constrained optimization as effective tools that are relevant to decision making in business, economics and other related areas.

Generic-II : General Mathematics-II

This paper divided into 3 sections in the 1st section there is brief introduction about lives and information on the work of different renowned mathematicians different from G problems like Konigsberg Bridge and four- colour map problems discussed. Also defined different types of functions via their graphs. Also studied geometry and different shapes section contains different type of system of linear equations and different types of methods to solve them. Also studied row equivalence and rank of a matrix.

16. B.A. (Prog.) with Music

Main objective of this subject is to familiarize the students about our old, rich heritage of classical music. Besides being a performing art music has its own complete theory system Art.

Students who opt this subject may be able to understand the Music (its logo, its rules etc.). Listening of good music, which soothes mind & soul, is also a great motive of this subject. SEC -Syllabus of this course strongly support the discipline course. Students learn tabla/ harmonium in this format which make students more skilled in their subject. Opting this the field of music:

*After regular practicing students might be able to teach and earn.

*Students can prepare themselves for post-graduation (Higher studies) and might be able to get jobs.

Following papers are being taught :

Semester 1

Paper name-Theory of Indian music (general) & biographies of musicians, composers, & musicologists.

Semester 2

Paper name- Theory of Indian music (general) & biographies of musicians, composers, & musicologists.

Semester-3

Paper name-Theory of Indian music, ancient Granthas & contribution of musicologists.

Semester 4

Paper name-Theory of Indian music, medieval Granthas & contribution of musicians & musicologists.

Semester 5

Paper name-Theory of Indian music and study of ancient granthas and Ragas.

Semester 6

Paper name- Musicology and study of Ragas & Talas.

SEC. For B.A. programme

Semester -3, 4, 5, 6

Paper- Value based and practical oriented course for Hindustani Music.

GE for B.A. programme

Semester -5, 6

Paper--Theory of Indian music and musicians.

17. B.A. (Hons.) in Philosophy

CORE COURSE (14 PAPERS)

SEMESTER – I

C1-PAPER- I – INDIAN PHILOSOPHY

The Indian Philosophy aims to introduce as well as delineate the fundamental metaphysical and epistemological concepts in the Indian philosophical thought. Beginning with doctrines of metaphysics with reference to the Upanisads, the paper further elaborates some of the key theories of the different orthodox and heterodox systems of Indian philosophy. Discussion on 'existence' from the Indian philosophical perspective to highlighting the debate on the idea of Ultimate Reality by some central schools of thought in Indian philosophy. A consolidated picture of Indian philosophical thought and impresses upon the young mind the significance of the Indian outlook to understand life.

C.2-PAPER –II- LOGIC

Logic provides training in the construction of good argumentation (reasoning from premises to a conclusion). Students learn basic skills of reasoning – the ability to draw valid and evaluate their own and others' background assumptions, and to grasp the implications and practical conclusions that follow from a claim or viewpoint being considered. Students learn to construct cogent arguments in standard premise/conclusion form. Fair-minded and careful argumentation can lead to valuable insight into the respective strengths and weaknesses of different positions and to the discovery of common ground between them.

SEMESTER – II

C.3- PAPER-III- GREEK PHILOSOPHY

The Greek Philosophy paper attempts to make its study relevant to the students who wish to seek a historical background to contemporary philosophy. In this course students study the Greek philosophers that have historical importance. It starts with a general survey of Pre-Socratic philosophers like the Milesians, Pythagorus, Heraclitus, Parmenides and the issues raised by Socrates, Plato and Aristotle. The study of Ancient Greek philosophy helps the students to gain the wisdom that makes meaningful life possible.

This course is also relevant to the goal of changing the society in which students live since significant change in society is likely to occur when its youth is provided with a truly liberal education. Aristotle and Socrates.

C.4-PAPER-IV- ETHICS

This paper on Ethics aims to enhance the comprehension of students on the subject matter of ethics. It begins with a discussion on the notion of morality, in terms of its classification into three classical approaches of Aristotle, Kant and J.S. Mill to leading a good or ethical human life. A section of the paper illustrates the application of ethical argumentation in cases of 'Capital Punishment' and 'Euthanasia'. The course culminates in a discussion on the conceptualization of what is considered to be right and wrong from the Indian philosophical perspective.

SEMESTER – III

C.5- PAPER – V- WESTERN PHILOSOPHY (Descartes to Kant)

This course introduces the students to the Western philosophical tradition, through the study of rationalists like Descartes, Spinoza and Leibnitz; empiricists like Locke, Berkeley and Immanuel Kant. Students are introduced with questions that have been significant to philosophy from its beginnings: questions about the nature of the mind or soul, the existence of God, and the good life. In the process of evaluating the arguments of these philosophers, students will develop their own philosophical and analytical skills.

C.6- PAPER –VI- SOCIAL AND POLITICAL PHILOSOPHY (INDIAN and WESTERN)

The course is broadly divided into two sections – Western and Indian. The course examines the principles and norms of social institutions and established modern institutions and thinkers. The objective is to build a sound theoretical foundation in understanding the complex social and political institutions, taking individual as a starting point in relation to the community. The course considers the application of these principles to such issues as justice, liberty, equality, rights, humanism etc. In the Indian section the philosophy of Gandhi is covered.

C.7-PAPER-VII- APPLIED ETHICS

Applied ethics is the practice of ethics that aims to guide the moral judgment governing the decisions we make in all areas of our lives. Issues of right and wrong are related to the correct approach to issues related to the value of human life, for example, euthanasia, suicide, foeticide etc. This course also discusses issues related to environmental ethics and media ethics.

SEMESTER – IV

C.8- PAPER-VIII-TEXT OF INDIAN PHILOSOPHY

In the Text of Indian philosophy 'Nyayabindu' of Dharmakirti has explained how to achieve valid knowledge through casual sequence in our experience. The aim of this paper is to provide this reference it explains the medium of valid knowledge, form of valid knowledge and the important component of knowledge. Basically the paper is focussing the epistemological point of view of Indian philosophers.

C.9- PAPER- IX- TEXT OF WESTERN PHILOSOPHY

The objective of this paper is to inculcate the core philosophical thinking among students. This is done by including some of the classical western philosopher's texts such as Existentialism by Heidegger, Philosophy and the Mirrors of Nature by Richard Rorty and The Last Word by Thomas Nagel. The paper engages students in reading the text and understanding the ongoing debate between existentialism, epistemology, hermeneutics and the subjectivism vs objectivism. It helps students in developing analytical, critical and holistic approaches to philosophy.

C.10-PAPER-X- TRUTH-FUNCTIONAL LOGIC: PROPOSITIONAL AND PREDICATE

Truth functional Logic is the course which enables students to understand and apply the basic concepts essential to a critical examination and evaluation of argumentative discourse. It helps students to develop analytical thinking skills to examine alternatives, explore complex questions and solve challenging problems. This also helps to synthesize information in order to arrive at reasonable conclusions, and the relevance of data and information. The course is aimed to recognize and produce definitions of basic concepts essential to critical examination and evaluation of arguments. Through this course students will apply standard techniques of truth table and natural deduction for truth-functional logic, important truth-functional logical properties and relations.

SEMESTER – V

C.11- PAPER- XI- ANALYTIC PHILOSOPHY

Analytic Philosophy holds that philosophy should apply logical techniques in order to attain conceptual clarity. It refers to certain historical developments in early 20th century philosophy. The development were Bertrand Russell along with Wittgenstein, G.E. Moore and logical positivists like A.J. Ayer. This paper mainly introduces the students with an overview of analytic philosophy. Students also get familiar with Ayer's famous arguments regarding whether the idea of Metaphysics should be abandoned and G.E. Moore's arguments to show that common sense beliefs are rational.

C.12-PAPER XII- CONTINENTAL PHILOSOPHY

The course is designed to bridge the gap between the analytical school that dominated the English speaking countries and the continental schools that remain pre-dominantly in Europe. The course introduces the students to the continental school of philosophy through an examination of some dominant schools of philosophy vis-a-vis Phenomenology, Existentialism, Structuralism, Hegelian dialectic. The course reflects the cognitive skills and ability to grasp and appreciate human condition. The objective of the paper is to initiate students of philosophy with those concepts and build a solid foundation.

B : DISCIPLINE SPECIFIC ELECTIVE-4 (DSE) SUBJECT CENTRIC(ANY TWO)

1. PHILOSOPHY OF MIND

Philosophy of mind is one of the most exciting areas within philosophy. It is concerned with questions about the nature of mind and the relation between our minds and the physical world. This course introduces students to the philosophy of mind by introducing participants to the mind-body problem, one of the most intractable problems in philosophy. Students through their reading of various classic positions in the mind-body debate. Primarily the course is expected to enhance the ability to explicate their own view on the mind-body problem.

2. PHILOSOPHY OF SCIENCE

Science has a long history of how we conflict and understand the sense of the world. The philosophical dimension of this stream investigates science as a way of knowing. The course covers fundamental concepts, logic, and ethics. In this paper students will study influential thinkers, such as Hume, Popper, Lakatos, Kuhn and Feyerband and also come to understand problems of induction (how do we know the world will continue to conform to our previous observations?) and scientific models (what is a scientific model, and how do we represent reality through simulations?)

3. PHILOSOPHY OF LAW

This paper inspires the students to confront the philosophical problems implicitly with self experiences, and experience of others and universe together with the questions of nature of clear, critical thinking within the frame work of law and morality. Through this paper students get aware about the general philosophical analysis of law and legal Institution. Jurisprudence has provide the knowledge of what distinguishes law as system of norms from other system of norms, such as ethical norms.

4. INDIAN MATERIALISM

Materialism is a form of philosophical monism which holds that matter is the fundamental substance in nature, and that all things, including mental aspects and consciousness, are reducible to various forms of matter. This view many problem arises like...How to create consciousness by material things? Who is the creator of all things? How to explain material things as formal cause? Etc... This paper discusses these problems and solution. This paper is also explaining the development of the concept of Indian Materialism through ancient era (Pre Charvaka) to contemporary era (B. Ramakrishna).

5. BIO-ETHICS

The objective of this paper is to make students familiar with the notion of bio-ethics. The paper is very much relevant in the contemporary time when people are shedding away their traditional values. There could be many including the ignorance of their surroundings.
